Vessel & Barges Streamlined Contingency Plans Webinar for Plan Holders

The Regulations and Guidance Group of the Prevention, Preparedness, and Response Program will be hosting a webinar on **December 9, 2020 from 10:30 – 11:30 a.m.** Alaska Standard Time. The goal is to familiarize interested stakeholders with recent amendments to the Oil Discharge Prevention and Contingency Plan regulations under 18 AAC 75. The amendment allows noncrude oil tank vessels and barges with a total storage capacity of less than 500 barrels to apply for a streamlined plan.

This one-hour webinar will:

- Explore how this regulation package streamlines the plan application process
- Highlight recent regulatory changes
- Identify resources to assist you with your application

Login and Dial-in information

To ensure the best quality presentation we will be using WebEx for the webinar. A teleconference line for audio will be available for those that do not have access to WebEx. **To join the WebEx Meeting*, click on the following link by:**

10:25 a.m. on December 9
