<tbody>
<tr>
<td>350</td>
<td>1. This project will correct the cause of a human disease event documented by ADEC or a recognized public health organization. Documentation required to receive 350 points.</td>
<td>Outbreaks of Hepatitis, Giardiasis or Cryptosporidiosis. Upgrading facilities to meet new EPA/ADEC regulations or resolve violation(s) of a wastewater permit with short term compliance deadline (≤ 1 year). Installation of new sewer mains in an area where there is documented well contamination resulting from sewer main leaks.</td>
</tr>
<tr>
<td>300</td>
<td>2. This project will correct conditions severe enough that a disease event may occur, although an event may have not yet been reported.</td>
<td>Violations of a wastewater permit with longer term compliance deadlines (&gt; 1 year). Documented failure of on-site disposal systems. Correction of documented Inflow and Infiltration issues that prevent the WWTP from meeting permit limits. Construction to address documented surface water contamination violation.</td>
</tr>
<tr>
<td>200</td>
<td>3. This project will minimize public health threats where the potential for a disease event exists.</td>
<td>Correction of documented issues with a high potential to violate a wastewater permit condition or ADEC design criteria. Replacement of pipes or facilities with documented leaks or constructed of inferior materials (example – asbestos cement pipe, structurally impaired lift station wet well). Improvements to a collection system prone to freeze-up. Instillation of new sewer mains to an area that is currently served by on-site systems and has a high potential of regulated contaminants exceeding safe standards.</td>
</tr>
<tr>
<td>100</td>
<td>4. This project will minimize potential future public health problems. There is no current threat of a disease event.</td>
<td>Replacement of collection system components that are at end of life, but no documentation of significant failure. Wastewater Treatment Facility upgrades to increase capacity and/or replace obsolete equipment that is not related to a permit violation correction. Improve system security, such as fencing, remote monitoring, access cards, etc. SCADA upgrades, backup power to a critical system component.</td>
</tr>
<tr>
<td>0</td>
<td>5. This project will not address any significant health related issues.</td>
<td>Sewer main alignment changes (rerouting mains that have little to no improvement on operation). Sewer main expansion for future development. Wastewater treatment plant or collection system studies, unless required by compliance conditions. Master plans, backup power to a tangential facility.</td>
</tr>

## WATER QUALITY CONSIDERATIONS (Select only one)

### PROTECTION

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>250</td>
<td>1. This project’s main emphasis is prevention of point source water pollution in an unimpaired waterway (Category 2 or Category 3) as reported in the Integrated Report.</td>
</tr>
</tbody>
</table>

### RESTORATION

The goal of the proposed project is to reduce pollution/improve water quality in a waterbody identified as impaired or polluted (Category 4 or Category 5) in the Integrated Report.

<table>
<thead>
<tr>
<th>Points</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>250</td>
<td>2. Reduces pollution specifically related to the impairment.</td>
</tr>
<tr>
<td>200</td>
<td>3. Reduces pollution to the waterbody that may not be specifically related to impairment.</td>
</tr>
<tr>
<td>100</td>
<td>4. This project will minimize the potential for future pollution event.</td>
</tr>
<tr>
<td>0</td>
<td>5. This project has minimal impact on future pollution event.</td>
