## 2024-25 Winter Season Air Quality Report for BLM - Glennallen, Alaska

The QuantaQ MODULAIR™ sensor in Glennallen (62.1106 ° N, 145.5439 ° W) was installed on 07/18/2024.

The sensor measures for carbon monoxide (CO), ozone (O<sub>3</sub>), nitrogen oxide (NO), nitrogen dioxide (NO<sub>2</sub>), particulate matter (PM<sub>2.5</sub> and PM<sub>10</sub>), temperature (°C), and relative humidity (RH). Data is collected every minute and is then processed into hourly averages.

The sensor in Glennallen has run well since its installation in July of 2024; there have been no physical issues with the sensor.

This data report covers the date range of October 1, 2024, to March 31, 2025.

### Daily PM<sub>2.5</sub> Air Quality Index (AQI) for October 1, 2024 – March 31, 2025

# 2024-25 Winter Season Air Quality Report for BLM - Glennallen

## Median PM<sub>2.5</sub> Concentrations for October 1, 2024 – March 31, 2025

### Descriptive Statistics of Air Pollutants\*

Parameter	1-hr PM <sub>2.5</sub> (µg/m³)	24-hr PM <sub>2.5</sub> (µg/m³)	1-hr PM <sub>10</sub> (µg/m³)**	24-hr PM <sub>10</sub> (µg/m³)**	1-hr O <sub>3</sub> (ppb)	1-hr NO <sub>2</sub> (ppb)	1-hr NO (ppb)	1-hr CO (ppb)
Min	0.02	0.08	0.00	0.00	2.30	0.00	1.39	0.29
Mean	0.83	0.79	2.31	1.81	24.28	11.48	5.03	0.38
1 <sup>st</sup> Max	90.82	9.53	986.00	64.67	58.80	42.99	38.87	0.76
2 <sup>nd</sup> Max	78.45	3.86	876.00	17.58	58.80	42.74	29.22	0.70

### Data Discussion

Glennallen’s PM<sub>2.5</sub> ambient air quality for the winter 2024-25 season fell mostly in the “good” range of the Air Quality Index (AQI; more information about AQI is provided on page 3), with two brief periods in the “moderate” to “unhealthy” AQI range in November and January. Diurnal patterns show little variability of PM<sub>2.5</sub> concentrations across different times of day, days of the week, or different months.

\* These statistics are based on preliminary data readings and are intended to provide a brief overview of sensor activity. Finalized data may be obtained upon request and through our annual statistical reports. Data from the community sensor network is non-regulatory and not comparable to the EPA’s National Ambient Air Quality Standards (NAAQS; more information about the EPA NAAQS is provided on page 3).

\*\* PM<sub>10</sub> particle sensors are influenced by weather events such as fog and snow due to hygroscopic effects, creating false maximum values that do not pose health risks.
