## State Revolving Fund Program

Project #26511-SE, Raw Water Main Replacement

### City of Craig receives fully subsidized \$1.8 million loan critical drinking water infrastructure

The Alaska Department of Environmental Conservation (ADEC) awarded a fully subsidized loan of \$1,800,000 to the City of Craig to design the replacement of approximately 5.5 miles of aging ductile water main that transmits raw water from North Fork Lake to the Craig water treatment plant.

ADEC is authorized by state law to issue loans to borrowers for eligible water system infrastructure projects. The administration of the loan is through the ADEC State Revolving Fund Program under the authority of the Alaska Drinking Water Fund.

The Alaska Drinking Fund is capitalized annually by a grant from the Environmental Protection Agency. The Drinking Water State Revolving Fund programs operate around the country to provide states and communities with the resources necessary to maintain and improve the infrastructure that provides clean and safe drinking water resources nationwide.
