Re: Authorization to Discharge 2013DB0004-0048 Volendam

Dear Mr./Mrs. Konstantin Konstantinov,

The Alaska Department of Environmental Conservation (DEC) has completed its review and acknowledges that you have submitted a complete Notice of Intent (NOI) form for the 2013DB0004 Large Commercial Passenger Vessel Wastewater Discharge General Permit (Permit).

Volendam is hereby authorized to discharge treated wastewater into Alaska marine waters and is issued wastewater discharge authorization number 2013DB0004-0048. Discharge from this vessel is authorized in accordance with the terms and conditions of the general permit and any vessel-specific conditions included in this document.

An electronic copy of the Permit and this authorization is available at the Department website http://dec.alaska.gov/water/cruise-ships/cruise-general-permit/

The following are vessel specific conditions that apply to this authorization:

- 1. Treated wastewater discharge is authorized when the vessel is operating at speeds of 6 knots or greater.
 - a. Mixing Zone: Mixing zone size for the permittee is authorized for discharges at speeds of 6 knots or greater and is limited to 63 meters in length, 5 meters in width, and a depth from the water surface to the depth the discharge port is below the water surface plus one meter. The shape of the mixing zone is an elongated rectangle that extends from the discharge port towards the stern of the ship. See Permit Section 5.2.3.
 - b. Effluent Limits and sampling requirements are identified in Tables 3 and 5 of the Permit
 - c. Discharge from multiple ports simultaneously is prohibited.

The permittee is reminded of the following permit requirements, and is responsible for all submissions and activities in the Permit even if they are not summarized below:

- All Commercial Passenger Vessels must register annually see Permit Part 2.1.3. http://dec.alaska.gov/water/cruise-ships/cruise-registration/.
- As per Permit Part 4.2.3, the permittee shall notify the Department, in writing, of wastewater treatment system modifications that change information provided to the Department in the approved NOI form at least 48 hours prior to the discharge of any treated wastewater into marine waters of the state. The NOI Application form can be accessed at the Departments website http://dec.alaska.gov/water/cruise-ships/cruise-general-permit/.

2013DB0004-0048 April 20, 2023

• Quality Assurance Project Plan (QAPP) see Permit Part 6.1: The owner/operator of a vessel that intends to discharge wastewater into Alaskan waters must submit a wastewater sampling QAPP to ADEC for approval.

- Vessels Specific Sampling Plan (VSSP) see Permit Part 6.2: All vessels are required to have an approved Vessel Specific Sampling Plan (VSSP) 21 days before sampling.
- Sampling requirements for discharges underway at speeds greater than 6 knots and associated effluent limits can be found in Tables 2, 3 and 5 of the permit.
- Sampling requirements for discharges at speeds less than 6 knots and associated effluent limits are located in Tables 4 and 6 of the permit.
- Discharge Monitoring Reports (DMRs): see Permit Part 7.2: DMRs are required for each calendar month that the vessel operated in the marine waters of the state and must be submitted within the first 21 days of the following calendar month.
- Submit all CPVEC registration correspondence, support documents, and reports to: DEC.WQ.Cruise@alaska.gov or mail to: ADEC-CPVEC, ATTN: Cruise Ship Program P.O. Box 111800 Juneau, AK 99811-1800.
- A copy of the General Permit 2013DB0004 and this authorization letter must be kept onboard the vessel. This letter does not relieve the permittee from other local, state, or federal government permitting requirements.

Please reference your permit authorization number 2013DB0004-0011R1 and vessel name in all future correspondence. If you have any questions regarding the above, please contact Sam Kito at 907-269-7542, or via email at Sam.Kito@alaska.gov.

Sincerely,

James Rypkema

Program Manager, Cruise Ship Permitting
