**Division of Spill Prevention and Response**  
**Prevention Preparedness and Response Program**  
***SITUATION REPORT (SITREP)***

**CHANGES FROM PREVIOUS SITREPS ARE DENOTED IN RED**

## **318 Richardson Hwy US Army Tanker Rollover**

**SITREP #:** 1

**SPILL #:** 18309906301

**TIME/DATE OF DISTRIBUTION:** 6:15 p.m. March 6, 2018

**POTENTIAL RESPONSIBLE PARTY (PRP):** United States Army.

**INCIDENT LOCATION:** Milepost 318 Richardson Highway, Approximately 45 Miles South of Fairbanks.

**TIME/DATE OF SPILL:** The incident occurred at approximately 2:22 p.m., March 4, 2018.

**HOW/WHEN SPILL WAS DISCOVERED AND REPORTED:** The release was reported to the Alaska Department of Environmental Conservation (ADEC) by the Alaska State Troopers through the afterhours spill line at 3:20p.m., March 4, 2018.

**TYPE/AMOUNT OF PRODUCT SPILLED:** An estimated 800 gallons of diesel fuel was released.

**CAUSE OF SPILL:** A United States Army (US Army) owned and operated tactical tanker hauling an estimated 1,150 gallons of diesel (JP8), when it left the roadway, rolling over and sliding partially down the east embankment.

**SOURCE CONTROL:** Drums were used to catch fuel being released from leaking hatches. Remaining fuel was pumped and transferred to an empty Heavy Expanded Mobility Tactical Truck (HEMTT) Tanker.

**RESPONSE ACTION:** US Army Fort Wainwright personnel, with the assistance of ADEC, conducted source control and lightering operations, with removal of the damaged vehicle completed at approximately 3:00 PM March 5, 2018. ADEC dug an initial trough in the snow to delineate the impacted area and completed a preliminary profile of the spill site. ADEC is coordinating response efforts regarding the slough with the Alaska Department of Natural Resources (ADNR). ADEC met with personnel from the US Army's contractor, Paragon-Jacobs, on March 5, 2018, to discuss future remediation efforts.

**RESOURCES AT RISK OR AFFECTED:** Alaska Department of Transportation (ADOT) right of way has been impacted. An unnamed slough connecting to the Tanana River is within 50 feet of the spill. Contaminated snow and soil could impact the unnamed slough and the Tanana River during a thaw event. The Tanana River is of particular concern due to the salmon that may be present. Clean up work in the area will impact travel along the Richardson Highway.

**FUTURE PLANS AND RECOMMENDATIONS:** ADEC is currently working with the US Army and Paragon- Jacobs as they develop a plan to remove contaminated snow and soil.

**WEATHER:** Tonight; Mostly cloudy. Low 11F. Winds ESE at 5 to 10 mph. Tomorrow; Partly cloudy. High around 25F. Winds light and variable.

**UNIFIED COMMAND AND PERSONNEL:**

Incident Commander: Richard Morris, US Army

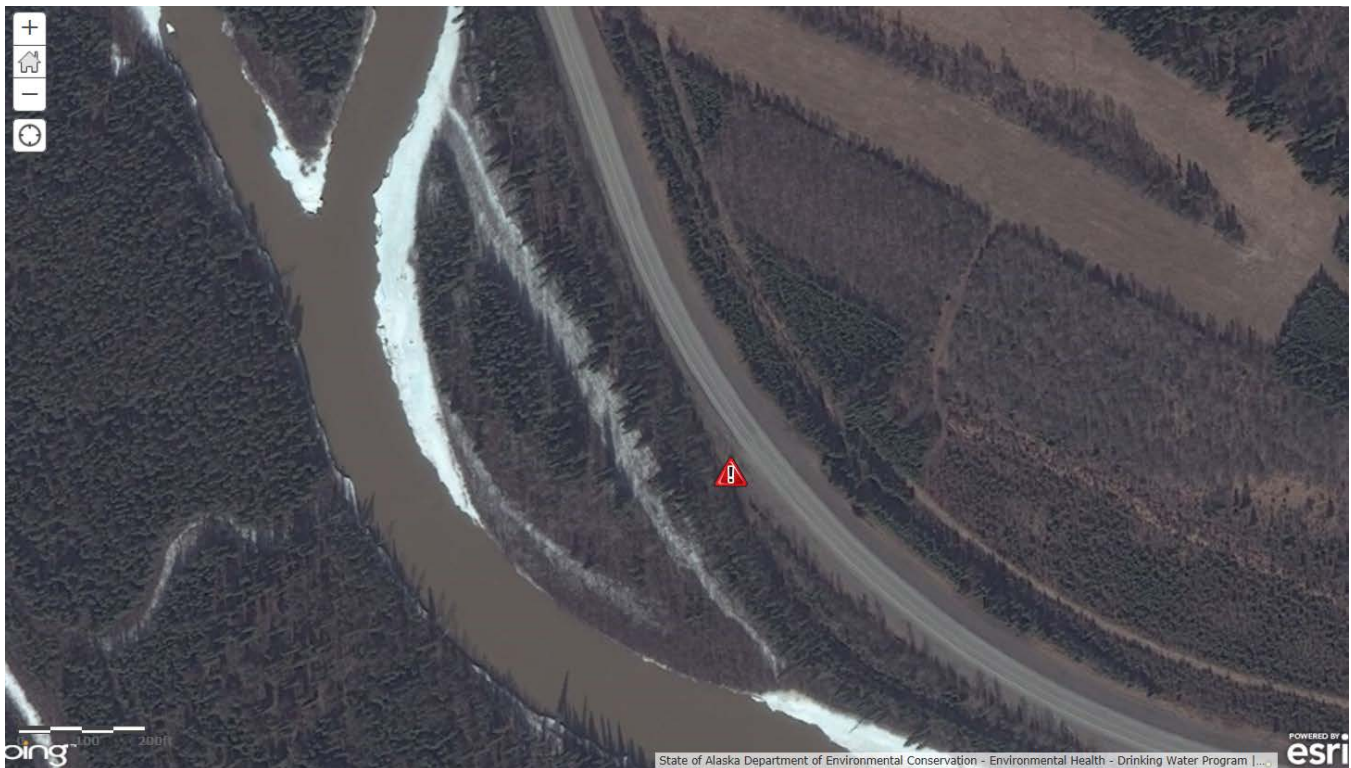

SOSC: Tom DeRuyter, ADEC

FOSC: Matt Carr, EPA

Field SOSC: Patrik Sartz, ADEC

**TIME/DATE OF THE NEXT REPORT DISTRIBUTION:** As the situation warrants.

**FOR ADDITIONAL INFORMATION CONTACT:** Tom DeRuyter, SOSC, ADEC (907) 451-2145
