

# **Diana Redwood**

I grew up here in Alaska and as a child remember the Exxon Valdez oil spill, from the oiled and dying animals to the economic fishing losses in Cordova. I strongly oppose any legislative or regulatory changes that would erode oil spill prevention and response standards or increase the risk of a catastrophic oil spill in the future. Please maintain the system as it is, provide sufficient funding, and ensure we continue to have the environment we enjoy today. Thank you for your time and attention.
