9770.5 – North Slope

The following presents regional organizational information for the North Slope Subarea:

(The area code for all phone and fax numbers is 907, unless otherwise indicated)

Borough:

North Slope Borough, P.O. Box 69, Barrow, AK 99723;

Phone: 852-2611; *Fax:* 852-0337;

E-mail: charlotte.brower@north-slope.org *Web:* <http://www.north-slope.org/>

Regional Native Corporation:

Arctic Slope Regional Corp., P.O. Box 129, Barrow, AK 99723;

Phone: 852-8633; *Fax:* 852-5733

School District:

North Slope Borough Schools, Box 169, Barrow, AK 99723-0169;

Phone: 852-5311; *Fax:* 852-5984

Regional Development:

North Slope Borough, Mayor's Office P.O. Box 69, Barrow, AK 99723;

Phone: 852-2611; *Fax:* 852-0337;

E-mail: charlotte.brower@north-slope.org *Web:* <http://www.north-slope.org/>

Housing Authority:

Tagiugmiullu Nunamiullu Housing Authority, P.O. Box 409, Barrow, AK 99723;

Phone: 852-0290; *Fax:* 852-0373

Regional Health Corporation:

Arctic Slope Native Association, Box 1232 Barrow, AK 99723

9770.5.01 – Anaktuvuk Pass

ANAKTUVUK PASS

Pronunciation: an-ack-TOO-vick

a.k.a. Naqragmiut Tribe

Population: 324 (2010 U.S. Census Population)

Incorporation Type: 2nd Class City

Borough Located In: North Slope Borough

Location & Climate:

Anaktuvuk Pass is located at 2,200 feet elevation on the divide between the Anaktuvuk and John Rivers in the central Brooks Range. The village lies about 250 miles northwest of Fairbanks and about the same distance southeast of Barrow. Anaktuvuk Pass is one of the most scenic villages on the North Slope, surrounded by tall mountains and near rivers and lakes. The community is located in the Gates of the Arctic National Parks and Preserve.

68.143 North Latitude and -151.735 West Longitude.

Sec. 18, T015S, R002E, Umiat Meridian

The climate of Anaktuvuk Pass is strongly continental. Due to its high elevation, summers are cool. The average temperature in January is -14 °F. The average summer temperature is 50 °F. Extremes ranging from a low of -56 to a high of 91 °F have been recorded. Precipitation averages 11 inches and snowfall averages 63 inches per year.

| | | | |
| | | | |

Economy:

Economic and employment opportunities are limited in Anaktuvuk Pass, due to its isolation. Hunting and trapping for the sale of skins, guiding hunters, or making traditional Caribou skin

masks or clothing provides income. Some residents have seasonal employment outside of the community. Anaktuvuk’s economy is largely based on subsistence hunting of caribou.

Culture & Demographics:

Anaktuvuk Pass, a historic caribou migration route, is the last remaining settlement of the inland Iñupiat Eskimo, the Nunamiut. The Nunamiut make up 88 percent of the population. The community is dependent upon subsistence activities. Caribou is the primary source of meat; other subsistence foods include trout, grayling, moose, sheep, brown bear, ptarmigan, water fowl and berries. Caribou migrate through the area in spring and fall.

The original nomadic Nunamiut left the Brooks Range and scattered in the early 1900s, mostly due to the collapse of the caribou population. By the 1940s, several Nunamiut families returned to the area and settled at the broad, treeless Anaktuvuk Pass, “the place of caribou droppings.” There is a year-round museum in Anaktuvuk Pass that celebrates the early natural, geological and cultural history of the area, including the migration of people across the Bering Land Bridge. The museum also displays Nunamiut clothing, household goods and hunting implements used around the time of the first contact with Westerners.

9770.5.02 – Atqasuk

ATOQASUK - Pronunciation: AT-kuh-suck a.k.a. Atkasook

Population: 233 (2010 U.S. Census Population)

Incorporation Type: 2nd Class City

Borough Located In: North Slope Borough

Location & Climate:

Atqasuk is located inland from the Arctic Ocean on the Meade River, about 60 miles southwest of Barrow.

70.469 North Latitude and -157.395 West Longitude.

Sec. 19, T013N, R021W, Umiat Meridian

The climate is arctic. The daily minimum temperature drops below freezing 300 days a year. Temperature extremes range from a low of -56 to a high of 78 °F. Precipitation is light, at 5 inches per year. Snowfall averages 22 inches per year.

| | | |
| | | |

Economy:

Education and other government services provide the majority of full-time employment in Atqasuk. Some residents also produce arts and crafts for sale including masks, mittens, dolls, yo-yos, ulus and parkas. Residents trap and sell furs to supplement cash income. Subsistence activities provide food sources.

Culture & Demographics:

Inupiat Eskimos comprise 91% of the population. Atqasuk’s economy is largely based on subsistence caribou hunting and fishing. Fish in the Meade River include grayling, burbot, salmon and whitefish. Local game includes, ptarmigan, ducks and geese. Residents also travel to the coast to participate in whaling and hunting other marine mammals - polar bear, seal, walrus, and whale are harvested and traded.

History: Atqasuk has long been established as a hunting and fishing ground. Abandoned sod houses, an old cellar and gravesite near the village provide evidence of an early settlement here. During World War II, coal was mined in the community and freighted to Barrow. During the next 10 years, the village existed under the name of Meade River. Although the population dwindled in the 1960s, former residents from Barrow moved to the community in the 1970s and re-established the village under the name of Atqasuk. The village was incorporated as a second-class city in 1982.

9770.5.03 – Barrow

BARROW - Pronunciation: (BARE-row) a.k.a. Ukpeagvik

Population: 4,212 (2010 U.S. Census Population)

Incorporation Type: 1st Class City

Borough Located In: North Slope Borough

Location & Climate:

Barrow, the northernmost community in the United States, is located on the Chukchi Sea coast, 10 miles south of Point Barrow, from which it takes its name. It lies 725 air miles from Anchorage.

71.290 North Latitude and 156.788 West Longitude.
 Sec. 06, T022N, R018W, Umiat Meridian

The climate of Barrow is arctic. Temperatures range from -56 to 78 °F, with an average temperature of 40 °F during summer. The daily minimum temperature is below freezing 324 days of the year. Prevailing winds are easterly and average 12 mph. Annual precipitation is light, averaging 5 inches, and annual snowfall is 20 inches. The Chukchi Sea is typically ice-free from mid-June through October.

The sun does not set between May 10th and August 2nd each summer and does not rise between Nov. 18th and January 24th each winter.

Economy:

Barrow is the economic center of the North Slope Borough, the city's primary employer, and numerous businesses provide support services to oil field operations. State and federal agencies also provide employment. The midnight sun has attracted tourism, and arts and crafts provide some cash income. In 2010, 4 residents held commercial fishing permits. Many residents rely upon subsistence food sources: whale, seal, polar bear, walrus, duck, caribou, grayling, and whitefish are harvested from the coast or nearby rivers and lakes.

Formation of the North Slope Borough in 1972 and the Arctic Slope Regional Corporation, as well as construction of the Prudhoe Bay oilfields and Trans-Alaska Pipeline, have each contributed to the development of Barrow. Today, tax revenues from the North Slope oil fields fund borough-wide services.

Culture & Demographics:

The majority of residents are Inupiat Eskimos (69%). Although Barrow is a modern community, subsistence hunting, fishing and whaling are still very important to the local economy. Traditional marine mammal hunts and other subsistence practices are an active part of the culture. Bowhead, gray, killer, and beluga whales migrate near Barrow each summer.

History and Historic/Cultural Properties:

Birnick archaeological site contains 16 dwelling mounds of a culture believed to have existed from 500-900 AD. The archaeological findings are considered a key link between the prehistoric cultures of Alaska and Canada.

In 1881, the U.S. Army established a meteorological and magnetic research station near Barrow. Another interesting site is the

Cape Smythe Whaling and Trading Station in nearby Browerville. Cape Smythe was built as a whaling station in 1893 and is the oldest frame building in the Arctic.

During the 1940s and 1950s, the military played an influential role in the area. Construction of the Distant Early Warning (DEW) line and exploration in the National Petroleum Reserve brought new people to the region. During the same time, the Naval Arctic Research Lab (NARL) was built near Barrow.

Visitors to Barrow will arrive at the Wiley Post-Will Rogers Memorial Airport. This airport was named to commemorate the famous pilot and the American humorist who died in an airplane crash just 15 miles south of Barrow in 1935. Across from the airport sits the Will Rogers and Wiley Post

9770.5.04 – Deadhorse & Prudhoe Bay

DEADHORSE & PRUDHOE BAY - Pronunciation: PROO-doh

Population: 2,174 (2010 U.S. Census Population)
Incorporation Type: Unincorporated
Borough Located In: North Slope Borough

Location & Climate:

Prudhoe Bay is adjacent to the Beaufort Sea, east of Nuiqsut, at the end of the Dalton Highway. Deadhorse serves as the gateway to the Prudhoe Bay and other North Slope oilfields.

70.255 North Latitude and 148.337 West Longitude.
 Sec. 08, T010N, R015E, Umiat Meridian

The climate of the North Slope is arctic. Temperatures range from -56 to 78 °F. Precipitation is light, averaging 5 inches, with 20 inches snow per year.

Economy:

The Prudhoe Bay oil fields provide some 2-3% of the nation's domestic oil supply and employ over 5,000 individuals in drilling, pipeline operations, cargo transportation, and a variety of support positions. U.S. Census population and employment figures reflect only permanent residents of Deadhorse and Prudhoe Bay -- most oil field workers travel home to Anchorage or the lower 48 when off duty. Pre-arranged tours are available through various tour companies.

Culture & Demographics:

Prudhoe Bay is a large work camp for the oil industry. All residents are employees of oil-drilling or oil-production and support companies and work long consecutive shifts. Living quarters and food are provided to the workforce.

9770.5.05 – Kaktovik

KAKTOVIK - Pronunciation: (kack-TOH-vick); includes Barter Island

Population: 239 (2010 U.S. Census)

Incorporation Type: 2nd Class City

Borough Located In: North Slope Borough

Location & Climate:

Kaktovik lies on the north shore of Barter Island, between the Okpilak and Jago Rivers on the Beaufort Sea coast. Kaktovik is 90 miles west of the Canadian border and 280 miles southeast of Barrow. The ruins of old Kaktovik can be seen from the road linking the village to the airport. It lies in the 19.6-million-acre Arctic National Wildlife Refuge, an occasional calving ground for the porcupine caribou herd.

70.132 North Latitude and 143.624 West Longitude.

Sec. 13, T009N, R033E, Umiat Meridian

The climate of Kaktovik is arctic. Temperatures range from -56 to 78 °F. Precipitation is light, averaging 5 inches, with snowfall averaging 20 inches.

| Location | Latitude & Longitude | Reason for protection |
| | | |
| | | |

Economy:

Economic opportunities in Kaktovik are limited due to the community's isolation, and unemployment is high. Most employment is in education, the North Slope Borough, or city services. Part-time seasonal jobs, such as construction projects, provide income.

Like other communities in the region, subsistence hunting, fishing and whaling play a major role in the local economy. Hunting in the nearby area is for Dall sheep, moose, caribou, and fox. The community also produces arts and crafts for sale such as etched baleen, carved ivory and masks. About one in every five household heads in Kaktovik receive monies from craft income.

Culture & Demographics:

Due to Kaktovik's isolation, the village has maintained its Inupiat Eskimo traditions. In the 2010 U.S. Census, 90% of residence identified as all or part Alaska Native, mostly Inupiat Eskimo. Subsistence is highly dependent upon caribou.

9770.5.06 – Nuiqsut

NUIQSUT - Pronunciation: (new-WICK-sit); var. Nooiksut

Population: 402 (2010 U.S. Census Population)

Incorporation Type: 2nd Class City

Borough Located In: North Slope Borough

Location & Climate:

Nuiqsut is located on the west bank of the Nechelik Channel of the Colville River Delta, about 35 river miles/18 air miles from the Beaufort Sea coast. It is 135 miles southeast of Barrow. The Colville River Delta has traditionally been a gathering and trading place for the Inupiat, and a good source for hunting and fishing. The Alpine Oilfield is eight miles from the village of Nuiqsut and a portion of the oilfield is on lands owned by Kuukpik Corporation and ASRC.

70.217 North Latitude and 150.976 West Longitude.
 Sec. 18, T010N, R005E, Umiat Meridian

The climate is arctic. Temperatures range from -56 to 78 °F. On average, the daily minimum temperature is below freezing 297 days each year. Annual precipitation is light, averaging 5 inches, with 20 inches of snowfall.

Economy:

Unemployment is high in Nuiqsut. The Kuukpik Native Corporation, school, borough services, and store provide most of the year-round employment in the village. Trapping and craft-making provide some income. Caribou, bowhead and beluga whale, seal, moose, and fish are staples of the diet. Polar bears are also hunted.

Culture & Demographics:

In the 2010 U.S. Census, 90% of residence identified as all or part Alaska Native, mostly Inupiat Eskimo. Residents practice a traditional subsistence lifestyle.

During the early 20th century, Christian missionaries were introduced to the Barrow region. This movement, along with the emergence of healthcare services and schools provided by the Bureau of Indian Affairs, prompted the Inupiat from Nuiqsut to immigrate to Barrow. The old village of Nuiqsut (Itqilippaa) was abandoned in the late 1940s, because there was no school. In 1973, 27 Inupiat families moved back to Nuiqsut from Barrow, and lived in tents braving the elements for over 18 months. In 1974, the Arctic Slope Regional Corporation funded construction of the village.

9770.5.07 – Point Hope

POINT HOPE

Population: 674 (2010 U.S. Census Population)

Incorporation Type: 2nd Class City

Borough Located In: North Slope Borough

Location & Climate:

Point Hope is located near the end of a triangular spit, the Point Hope peninsula, jutting 15 miles into the Chukchi Sea, 250 miles southwest of Barrow. The peninsula is a large gravel spit that forms the western-most extension of the northwest Alaska coast. Erosion and a threat of storm flooding from the Chukchi Sea led to its relocation to higher ground in the mid-1970s

68.348 North Latitude and 166.808 West Longitude.

Sec. 16, T034N, R035W, Kateel River Meridian

The climate is arctic. Temperatures range from -49 to 78 °F. Precipitation is light, averaging only 10 inches annually, with 36 inches of snowfall. The Chukchi Sea is ice-free from late June until mid-September.

Economy:

Point Hope is the second largest city on the North Slope. The local economy is largely based on subsistence hunting, fishing and whaling. The Borough employs more than 18 percent of the working population and the school district employs 26 percent. Close to forty percent of the labor force works in the private sector.

Residents produce a wide array of arts and crafts for sale including carved ivory, baleen baskets, whale bone, masks, caribou skin masks, etched baleen, Eskimo parkas, ivory-tipped harpoons and bird spears.

Culture & Demographics:

In the 2010 U.S. Census, Alaska Natives, primarily Inupiat Eskimos made up 93 percent of Point Hope’s population. Point Hope residents (Tikeraqmuit Inupiat Eskimos) are dependent upon marine subsistence. This highly favorable site, with its abundant resources, has enabled the Tikeraqmuit to retain strong cultural traditions after more than a century of outside influences.

This Point Hope peninsula is one of the longest continually inhabited areas in North America. Some of the earliest residents came here for bowhead whaling some 2,000 years ago after crossing the Siberian land bridge.

Visitors to the area can see the remains of Old Tigara Village, a prehistoric site with the remains of sod houses. There is an even earlier site with about 800 house pits known as Ipiutak, occupied from about 500 BC to 100 AD. Ipiutak and the surrounding archaeological district are on the National Register of Historic Places. In addition to the prehistoric village sites, there are old burial grounds in the area including a cemetery marked by large whale bones standing on end.

9770.5.08 – Point Lay

POINT LAY - Also Known As: Kali

Population: 189 (2010 U.S. Census Population)

Incorporation Type: Unincorporated
Borough Located In: North Slope Borough

Location & Climate:

Point Lay is located on the Chukchi Sea coast, protected from the ocean by the Kasugaluk Lagoon. It is 150 miles southwest of Barrow. Kali, the Iñupiat name for the village, means "mound" and refers to the elevated mound on which it stands.

69.736 North Latitude and 163.012 West Longitude.
 Sec. 26, T005N, R045W, Umiat Meridian

The climate is arctic. Temperatures range from -55 to 78 °F. Precipitation is light, averaging 7 inches annually, with 21 inches of snow. The Chukchi Sea is ice-free from late June until September.

| Location | Latitude & Longitude | Reason for protection |
| | | |
| | | |

Economy:

Most year-round employment opportunities are with the borough government or the school. Subsistence activities provide food sources.

Culture & Demographics:

In the 2010 U.S. Census, Alaska Natives, primarily Inupiat Eskimos made up 93 percent of Point Lay's population. Point Lay is a traditional Inupiat Eskimo village, with a dependence upon subsistence activities. Seals, walrus, beluga, caribou, and fish are staples of the diet. The deeply indented shoreline prevented effective bowhead whaling and the village never fully participated in the whaling culture. The village's traditional hunt of the beluga whales is similar to the bowhead whaling culture in other North Slope villages.

Point Lay is probably the last remaining village of the Kuukpaagruk people.

9770.5.09 – Wainwright

WAINWRIGHT - Pronunciation: (WANE-rite)

Population: 556 (2010 U.S. Census Population)

Incorporation Type: 2nd Class City

Borough Located In: North Slope Borough

Location & Climate:

Wainwright sits on a wave-eroded coastal bluff of a narrow peninsula which separates Wainwright Inlet from the Chukchi Sea. It is 3 miles northeast of the Kuk River estuary and about 70 miles southwest of Barrow.

70.637 North Latitude and 160.038 West Longitude.

Sec. 26, T005N, R045W, Umiat Meridian

The climate is arctic. Temperatures range from -56 to 80 °F. Precipitation is light, averaging 5 inches annually, with 12 inches of snow. The Chukchi Sea is ice-free from mid-July through September.

Economy:

Economic opportunities in Wainwright are influenced by its proximity to Barrow and the fact that it is one of the older, more established villages. Most of the year-round positions are in borough services. Wainwright has a larger private sector than most villages: 38 percent of the work force is employed by private businesses, primarily the village and regional corporations. The Borough employs 30 percent of the work force and the School District provides jobs for another 25 percent.

Sale of local Eskimo arts and crafts supplement income.

Culture & Demographics:

Most Wainwright inhabitants are Inupiat Eskimos who practice a subsistence lifestyle. Their ancestors were the Utukamiut (people of the Utukok River) and Kukmiut (people of the Kuk River).

Wainwright's subsistence hunting revolves primarily around Bowhead and beluga whales and caribou. Seal, walrus, polar bear, birds, and fish are also harvested. Local arts and crafts include carved ivory figurines and jewelry, baleen boats, whale bone carvings, clocks, knitted caps and gloves.
