Subject: Response to ADEC's request for additional information for the application for Construction Permit AQ0069CPT02, Grayling Platform

Dear Jesse,

Hilcorp Alaska, LLC (Hilcorp) received on March 14, 2024 a letter from the Alaska Department of Environmental Conservation (Department) requesting additional information in response to the application for Construction Permit AQ0069CPT02, Grayling Platform. The letter stipulated that Hilcorp provide the requested information by April 15. Hilcorp requested a deadline extension on April 12 and the Department's approval to extend the deadline to June 21 was received via email on April 16.

This letter includes 2 enclosures that respond to the Department's March 14, 2024 request for information. **Attachment 1** responds to requests specific to the SO₂ BACT analysis included in Attachment C of the application submitted December 4, 2023.

Attachment 2 responds to requests specific to the ambient air quality impact analysis included in Attachment F of the application. In addition to providing responses to specific requests, the attachment also provides the results of a revised ambient air quality impact analysis prepared to address errors and facilitate responding to several of the Department's requests. This attachment strengthens the conclusions reached in our permit application.

The revised air quality model input/output files are provided separately, either as an attachment to the full response package transmitted by email or via a web-based file transfer protocol as **Attachment 3**.

Lastly, as mentioned in our April 12, 2024 request to extend the deadline, Hilcorp asks that the Department change the Grayling Platform Title V permit AQ0069TVP04 in accordance with 18 AAC 50.326(c)(2) by administrative amendment under 40 CFR 71.7(d).

If you have any questions or require additional information regarding this response and request, please contact Drew Anderson at (907) 777-8488 or ananderson@hilcorp.com.

“Based on information and belief formed after reasonable inquiry, I certify that the statements and information in and attached to this document are true, accurate, and complete.”

Sincerely,

Chris Kanyer for Trudi Hallett
Asset Team Lead
Hilcorp Alaska, LLC

Enclosures:

- Attachment 1 - Response to Requests for Additional Information for the Application for Construction Permit AQ0069CPT02, Grayling Platform Specific to Application Attachment C – SO2 Best Available Control Technology (BACT)
- Attachment 2 - Response to Requests for Additional Information for the Application for Construction Permit AQ0069CPT02, Grayling Platform Specific to Application Attachment F – Ambient Air Quality Impact Assessment
- Attachment 3 – Revised Dispersion Modeling Input/Output Files
