

Notes:
- < = Not detected; Detection limit is listed.
- J = Estimated concentration detected below the laboratory limit of quantitation (LOQ); flag applied by laboratory.
- J* = Estimated concentration, biased low, due to QC failures; flag applied by Shannon & Wilson, Inc.
- JL* = Result is considered estimated, biased low. Flag applied by Shannon & Wilson, Inc.
- µg/L = micrograms per liter.
- Only monitoring wells scheduled for sampling per the Long Term Monitoring Plan - 2017 Update, and one-time 2022 additions are shown on this figure.
- July 21, 2018 Imagery provided by Quantum Spatial.
- For locations with duplicate sample results, the highest result is shown.
- Contours are generally based on second semiannual 2022 results and include some historical data where a second semiannual sample was not collected.
- * = Monitoring wells that are a part of the annual sampling plan, but were sampled during the first semiannual 2022 sampling event.

Legend

- Monitoring Well
- Observation Well
- Vertical Profile Transect Well
- Property Boundary
- Approximate Sulfolane Isopleth in µg/L

Sulfolane Results

- Not Detected
- 3.14 - < 20 µg/L
- 20 - < 100 µg/L
- 100 - < 400 µg/L
- 400 µg/L
