Fill out **Attachment A-1**. Identify each type of product line effluent or discharge type proposed from each outfall and the production capacity of each facility discharging from each outfall based upon historical operations and design capacity. Attachment A-1 requires the reporting of latitude and longitude in decimal degrees, using NAD 1983 or WGS 1984 datum of each outfall terminus. Identify each outfall's associated discharges, including but not limited to:

- **Main butchering commodity lines** (e.g., salmon fillets, pollock fillets, H&G salmon, H&G herring, crab, shellfish, etc.; process disinfectants (list type)).
- **Macroalgae Processing** (e.g., Kelp and seaweed- provide effluent discharge characteristics and macroalgae's proposed processing techniques).
- **By-product commodity lines** (e.g., Fish Meal plant, Fish Oil plant, Fish Hydrolysate, other – identify).
- **Other outfall discharges- If any of these are discharged through outfalls identified above, list under the appropriate outfall** (e.g., Cooling water, boiler water, cooking water (including retort water), refrigeration condensate, refrigerated seawater, transfer water, live tank water, air scrubber water, freshwater pressure relief water, monitoring locations for fish hold wastewaters discharged to vessels, etc.).

Attach a Facility Map. A legible area map shall depict the facility front door/main building location, outfall locations, moored support vessels/barges, and incoming water (see Section IX below) supply locations shown in relationship to the outfall terminuses. These mapped outfall and incoming water supply features shall also be clearly correlated to the Line Drawing submitted with the NOI. The map shall be based upon an official map of the U.S. Geologic Survey (USGS) of a scale of resolution from 1:20,000 to 1:65,000, depicting:

- The front door of the main facility's location, including latitude/longitude.
- Docked/moored support vessel locations, including latitude/longitude.
- Each outfall(s) terminus location, including latitudes/longitudes.
- Each incoming fresh water and/or seawater supply location, including latitude/longitude.

Do you send your waste to another seafood processing facility or another by-product commodity line/facility?

Yes

No

If yes, please describe. Include the average annual amount/pounds sent to the facility.

IX. Incoming Water Supply

Each incoming fresh water and /or seawater supply location shall be identified in the **Attachment A-1** submittal, and identified in a **legible Area map** as described in Section VIII above. In **Attachment A-1**, please provide the following:

For the facility's own intakes: Identify each seawater intake(s), fresh water municipal supply intake(s), well location(s), stream withdrawal location(s), and/or Other (please describe), the latitude and longitude in decimal degrees, and the maximum daily intake volume (mgd), average monthly flow (gallons), and average annual flow (gallons) of each water intake location.

For other intakes: Identify each seawater intake(s), fresh water municipal supply intake(s), well location(s), stream withdrawal location(s), and/or Other (please describe) and the latitude and longitude in decimal degrees.
