

Division of Water
State Revolving Fund Program

Alaska Drinking Water Fund Emerging Contaminant Scoring Sheet

For a project to be eligible for Emerging Contaminants funding, the primary purpose must be to address emerging contaminants in drinking water. Priority points are given to projects that address perfluoroalkyl and polyfluoroalkyl substances (PFAS) and cyanobacteria toxins.

If EPA has promulgated a National Primary Drinking Water Regulation, with the exception of PFAS, then a project whose primary purpose is to address that contaminant may still be eligible for SRF financing but will not be eligible for financing as an Emerging Contaminant project.

Questions about eligibility for Emerging Contaminant funding may be sent to dec.srfprogram@alaska.gov.

If applicable to your project, complete this form and attach it to the upload document step of the OASys Drinking Water questionnaire.

APPLICANT INFORMATION

Public Water System Name: _____

Project Title: _____

Name and Title of Questionnaire Preparer: _____

PROJECT INFORMATION

Primary Purpose (*Select only one*)

Will the primary purpose of this project be to address emerging contaminants in drinking water?

No. If no, this form is not needed for your project questionnaire.

Yes. If yes, explain how this project will address an emerging contaminant issue.

Finished water PFAS Concentration *(Select only one)*

Will this project address a perfluoroalkyl and polyfluoroalkyl (PFAS) contaminant issue? If yes, indicate the PFAS concentration in finished drinking water. A copy of the testing data must be provided to receive points. Select one of the options below if applicable to your project.

Concentration \geq 70 parts per trillion (ppt). (20 Pts.)

Concentration 20 – 69 ppt. (15 Pts)

Concentration 4 – 19 ppt. (10 Pts)

Cyanobacterial Toxin Contaminant *(Select only one)*

Will this project address a cyanobacteria toxin issue? If yes, select the appropriate option below applicable to the history of your system.

Source has reported at least 1 harmful algal bloom for 3 consecutive years. **Documentation is required for points.** (15 Pts)

Source has reported at least 1 harmful algal bloom for 2 consecutive years. **Documentation is required for points.** (10 Pts)

Source has reported a harmful algal bloom in the last 3 years. **Documentation is required for points.** (5 Pts)

Households/Connections *(Select only one)*

How many households/connections will benefit from this project?

Project will benefit 100 or more households/service connections. (10 Pts)

Project will benefit 50 – 99 households/service connections. (8 Pts)

Project will benefit 1 – 49 households/service connections. (6 Pts)

Consolidation *(Select only one)*

Will this project consolidate an existing system that has emerging contaminant issues with another public water system that can provide clean safe drinking water?

Yes. (10 Pts)

No. (0 Pts)
