

<u>Application for DEC Brownfields Assessment</u> & Cleanup (DBAC) Services (2024-2025)

Application period: August 15, 2024 through November 15, 2024

Background:

DEC provides site-specific technical support through its DEC Brownfields Assessment and Cleanup (DBAC) program. Depending on the needs of a specific project, DBAC services can include anything from environmental site assessments to cleanup planning to some cleanup activities. DBAC awards are provided as <u>services</u>, not <u>grants</u>. As such, for selected projects, DEC will conduct and manage the project, including selecting an environmental contractor and completing necessary paperwork on behalf of the applicant.

Eligible parties can be public entities and non-profit organizations, including municipalities, tribal governments, native village/regional corporations, and community development organizations with an interest in redeveloping or reusing abandoned or underutilized properties.

For more information regarding DBACs, please reach out to the DEC Brownfields team at dec.brownfields@alaska.gov or see DEC's DBAC Fact Sheet, which can be found at https://dec.alaska.gov/spar/csp/brownfields/assessment-cleanup/dbac-fact-sheet/.

Instructions:

Please answer all questions and provide as much information as possible, as this application will provide the tools necessary to determine if your project is eligible for brownfields services. Once eligibility is established, DEC will award projects based on information provided in Section 3 and as resources allow.

A <u>DBAC Self-Check Eligibility Tool</u>, which is a series of Yes/No questions aimed at identifying potential project eligibility issues, is available online and included at the end of this application as a resource. After reviewing the self-check eligibility tool, if you have any questions regarding the application or eligibility, please do not hesitate to contact DEC Brownfields staff to discuss. Additionally, Brownfields staff can also review your draft application prior to final submittal to evaluate eligibility and completeness.

The following DBAC application is organized as follows: Section 1: Basic Site Information; Section 2. General Eligibility Criteria; and Section 3. Evaluation Criteria. All questions should be filled out to the best of the applicant's ability.

Submission Requirements

A completed application must be received no later than **5 p.m. AST on Friday November 15**, **2024.** Applications should be submitted to:

DEC Brownfields Team <u>dec.brownfields@alaska.gov</u> Subject Line: DBAC Application

If you have any questions or unable to submit an application electronically, please contact dec.brownfields@alaska.gov.

Request for Application Meeting

Potential applicants for DEC Brownfields Assessment & Cleanup services are **highly encouraged** to have a meeting with DEC Brownfield Staff concerning their application. Early communication will allow participants to receive technical assistance and allow time to address any deficiencies in the application. Our goal is to assist you in completing a comprehensive and successful application! Further, please go through the checklist below to ensure the application has all the necessary information and requirements.

DBAC Application Submittal Checklist

Before submitting your DBAC request form, please check the following items are complete: Did you answer each question?
☐ If required, did you attach a letter from the property owner granting access to the site, if the owner is different from the applicant?
☐ If applicable, did you attach past environmental reports about the site?
☐ Did you attach a site map or aerial photograph of the site with the information requested and any other photos available?
☐ Did you identify a primary contact for the duration of the DBAC project?
☐ Did you attach a letter of support from each team member?
☐ Did you attach documentation demonstrating the viability of the reuse or redevelopment plan ?
☐ Did you attach documentation demonstrating that there is community support and benefit for the project?
After reviewing your application, DEC may have clarifying questions to help in its evaluation. May DEC contact you should it have additional questions?
\Box Yes \Box No

SECTION 1: BASIC SITE INFORMATION Applicant: Name: Address: TRP/IGAP EPA Project Officer (if applicable): Owner (if different from applicant): *The owner of the property must allow DEC access to the site. If the applicant is different from the owner, written consent will be required from the owner to secure access for DEC and its contractors to conduct the assessment. Please attach a letter from the property owner granting access to the site if required* Name: Address: Is the owner of the property: ☐ Private □City/Public □ Native Corp □Tribe Is the property expected to change ownership in the near future? □Yes \square No Site Name: Site Location: Address: Legal Description (if known):

SECTION 2: GENERAL ELIGIBILITY CRITERIA

Is the site or facility owned or under the control of the federal government?	
□Yes* □No	
*If the property is owned or under the control of the federal government, the site is <u>not</u> eligible services.	for
Is or has the site or facility been owned by the State of Alaska when contamination occurred?	
□ Yes* □ No	
*If the State of Alaska is a responsible party, the project may not be eligible for DBAC funding.	
To your knowledge, has the site or facility received funding for remediation from the Leak- Underground Storage Tank (LUST) TrustFund?	ing
□Yes* □No	
*If the site has received funding from the LUST Trust Fund to conduct assessment or cleanup activities the site or facility may not be eligible for services unless certain additional criteria are met.	ies,
Is the applicant directly responsible for the contamination on the property? $\Box Yes^*$	
*If yes, this site may not be eligible for brownfields services.	
Is the current owner responsible for contamination on the property?	
□Yes* □No	
*If yes, this site may not be eligible for brownfields services.	
Do you have a reuse plan that will provide a benefit to your community?	
□Yes □No*	
*If no, this site is not eligible for brownfields services.	
If any of the above indicate that the site or facility is not eligible, contact DEC to discuss prior continuing your application. Eligibility is a site-specific determination and may still be possible dependent.	

dec.brownfields@alaska.gov

upon the applicant, project, and site history. We are available to talk with you about your project during

the application period. Email the DEC Brownfields Team at:

SECTION 3: EVALUATION CRITERIA

1.) Project Needs:		
What services are you seeking	ng?	
□Assessment	☐Cleanup Planning	□Cleanup
Describe to the best of you assessment or cleanup activity	, ,	eam believes the needed environmental
requested. Some things to olocal assistance with site visexcavation equipment, and	consider: our contractors doin its, setting up interviews with local transportation; site wo	re available to assist with the project being g assessment or cleanup work often require those knowledgeable about the site, lodging, ork often requires heavy equipment, heavy s (as defined in 18 AAC 75.333).
2.) Project Team:		
ensure continuity beyond this and contact information of each team member. Please n Please designate one member project who can answer q	is effort and coordination for sue each individual or organization tote that environmental field we ber of your project team as the uestions for DEC or their c	bly from more than one organization) to access of the overall project. Disclaimer

Under no circumstances does an award of DBAC services imply that DEC accepts liability for any contamination that may exist at the site, nor is DEC responsible for any necessary cleanup of hazardous substances that may be found at the site. Liability for contamination on a property is specifically addressed in Alaska Statute (AS) 46.03.822, which outlines those who are liable for the release of a hazardous substance. The general liability categories include: (1) those with an ownership interest in the property; (2) those in control of the substance at the time of the release; or (3) those who arrange for disposal or transport of the substance.

Brownfield work focuses on clarifying environmental concerns associated with property for which there is no known viable responsible party. By applying for a DEC Brownfield Assessment or Cleanup, it should be clear to all parties associated with a request that the work requested of DEC is designed to identify, clarify, and in some cases, remediate environmental hindrances that currently impede the continued use, proposed use, redevelopment, or sale of a property. Work conducted by DEC may result in identifying a property as a contaminated site, and require the site be listed on DEC's Contaminated Sites Database. With listing comes the requirement of potentially responsible and liable parties to address cleanup of contamination in accordance with regulatory requirements.

DEC Brownfields Assessment and Cleanup Award Process

August - November - Application Submittal to ADEC

November - December - Application review by ADEC, including evaluating projects/applicants for

eligibility

January - ADEC contacts applicants with questions and updates regarding application status

February – ADEC submits preliminarily-selected DBAC projects to EPA Region 10 for project eligibility determinations

April - May – ADEC begins notifying eligible projects of DBAC award selections based on funding availability

April - May - ADEC builds scope of work for project and solicits contractor proposals

May - June - Work awarded to contractor

June/July - Community Kick-off meeting with ADEC

Summer/Fall - Field work completed on site

Fall/Winter – Report on field work drafted and finalized

DBAC Eligibility Self-Check Tool

DEC BROWNFIELDS ASSESSMENT AND CLEANUP (DBAC) SERVICES: ELIGIBILITY SELF-CHECK TOOL

This self-check tool was developed by the <u>Center for Creative Land Recycling (CCLR)</u> and the Alaska Department of Environmental Conservation (DEC) to provide an initial screen for potential applicants interested in applying for DBAC services. This tool is not an exhaustive list of considerations for eligibility, but rather highlights issues that often impact DBAC eligibility prior to applying. If any blue boxes are checked, the project may not be eligible; however, eligibility is a site-specific determination and may still be possible depending upon the applicant, project, and site history. If you have any questions or would like to discuss project eligibility, please contact DEC and/or CCLR prior to submitting an application. For more information, please see EPA's <u>Information on Sites Eligible for Brownfields Funding</u>. If you do not know the answers to any of the following questions, leave blank and contact DEC and/or CCLR.

	General Eligibility Questions	Yes	No	Guidance Information
1.	Is the property owned by the US government?			Property can mean real property or any onsite buildings.
2.	Is or has the property been owned by the State of Alaska when the potential contamination occurred?			If the State of Alaska is a responsible party, the project is likely not eligible for DBAC funding; however, the property may be eligible for <u>other types of brownfields funding</u> .
3.	Is the applicant the owner of the property or, if not, will access to the property be secured?			DEC requires site access to conduct DBAC services. If the applicant does not own the property, has the applicant secured (or will secure) site access?
4.	Did the current owner cause or contribute to the contamination on the property?			If the current owner caused or exacerbated the contamination, the project may not be eligible depending upon site-specific factors.
5.	Do you have a reuse plan that will provide a benefit to your community?			The applicant must be able to describe the anticipated reuse of the property once it is assessed/cleaned up. A "reuse plan" can be a description of the anticipated reuse, documented community support for the described reuse (letters, local government/council minutes), sitespecific renderings/designs, among others.
6.	Has the property received funding to conduct site work through the Leaking Underground Storage Tank (LUST) Trust Fund?			If the property has a leaking underground storage tank that has been previously investigated or cleaned up using LUST funding, the project may not be eligible, unless certain additional criteria are met.
7.	Have polychlorinated biphenyls (PCBs) been documented on the property (including in building materials)?			PCBs can be found in building materials (for example, in paints, caulk, etc.) in buildings constructed between 1950s and 1970s. Materials containing PCB concentrations above 50 parts per million are subject to remediation under the Toxic Substances Control Act (TSCA) and the project may not be eligible unless additional criteria are met; however, if

				PCBs are only suspected, DBAC funding may be used to determine their presence.
	Petroleum-Specific Questions	Yes	No	Respond to Questions 8 - 11 if you believe the property of interest may be contaminated with petroleum; otherwise leave blank.
8.	Has there been a release of petroleum on the property while the current owner has owned the property?			Has the current owner used/managed petroleum at the site in a manner that may have caused contamination (for example: operation of a tank farm, heating oil tank, or gas station on the property)? If so, the project may not be eligible depending upon other site-specific factors.
9.	Did a petroleum release occur on the property while the immediate past owner owned the property (prior to the property being acquired by the current owner)?			Did the immediate past owner use/manage petroleum at the site in a manner that may have caused contamination (for example: operation of a tank farm, heating oil tank, or gas station on the property)? If so, the project may not be eligible depending upon other site-specific factors.
10.	Has there been a release of petroleum AND is there a potentially responsible party that is financially able to pay for assessment/cleanup activities at the property? (this often refers to the current and/or previous owner, depending upon whether contamination occurred before or after the property was acquired)			If the current and previous owners are not financially able to assess/cleanup petroleum contamination at the property, the project may be eligible for DBAC funding depending on other site-specific factors. In this case, the applicant will need to work with DEC to verify a lack of ability to pay for assessment/cleanup activities.
11	a. Was the property acquired through tax foreclosure, abandonment, the Alaska Native Claims Settlement Act (ANCSA), or equivalent government proceeding?	If YES go to 11b; if NO, consider prior ownership for RP status (see Questions 8-9)		If the property was acquired by one of these means (or through a similar transaction), project eligibility may depend upon whether the current owner is responsible for contamination and their financial ability to fund
	b. If you responded YES: Has there been a release of petroleum that occurred since the property was acquired?			assessment/cleanup activities.
