

ACADEMY OF WATER EDUCATION Water Treatment O&M

DATE: July 13-17, 2026

LOCATION: Anchorage, Alaska

This hands-on training course provides comprehensive instruction in water treatment principles, operational practices, and applied math. Through a blend of classroom learning and practical workshops, participants gain the knowledge and skills necessary to operate and maintain water treatment systems and prepare for state certification exams.

Schedule

- **Class:** Mon–Thu: 8:00 AM – 5:00 PM | Fri: EXAM 8:00 AM – Completion

Learning Outcomes

Upon completion, students will be able to:

- Perform water treatment calculations (area, volume, flow conversions, pounds formula, mg/L, head)
- Understand operator duties, plant operations, and maintenance planning
- Differentiate groundwater and surface water sources
- Identify reservoirs, intake structures, and filtration/coagulation processes
- Apply water softening, stabilization, and hardness calculations
- Demonstrate chlorine disinfection knowledge and safety procedures
- Recognize cathodic protection and understand galvanic corrosion
- Evaluate chemical treatments for taste and odor issues
- Explain water sampling categories and procedures
