

## Department of Environmental Conservation's Air Monitoring Program Community-Based Air Monitoring Project

# 2024-25 Winter Season Air Quality Report for City and Borough of Yakutat, Yakutat, Alaska

The QuantAQ MODULAIR<sup>™</sup> sensor in Yakutat (609 Forest Highway No 10, Yakutat, AK 99689) was installed on 10/24/2024.

The sensor measures for carbon monoxide (CO), ozone  $(O_3)$ , nitrogen oxide (NO), nitrogen dioxide (NO<sub>2</sub>), particulate matter (PM<sub>2.5</sub> and PM<sub>10</sub>), temperature (°C), and relative humidity (RH). Data is collected every minute and is then processed into hourly averages.

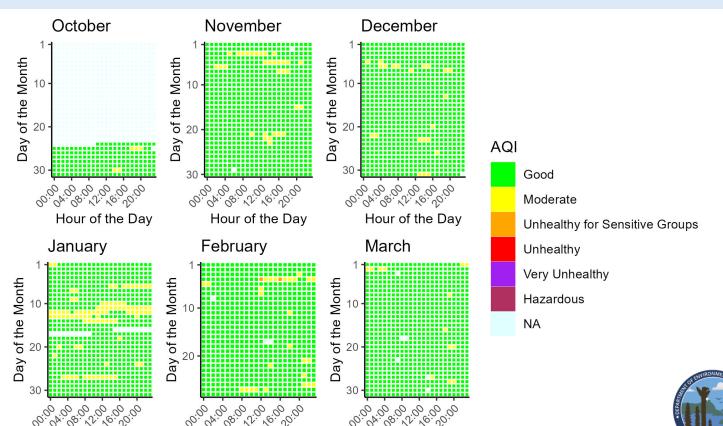

The sensor in Yakutat has run well since its installation in October of 2024; there have been no physical issues with the sensor.

This data report covers the date range of October 24, 2024, to March 31, 2025.

Hour of the Day

## Daily PM<sub>2.5</sub> Air Quality Index (AQI) for October 24, 2024 – March 31, 2025

### 2024-25 Winter Season Air Quality Report for City and Borough of Yakutat

### Median PM<sub>2.5</sub> Concentrations for October 24, 2024 – March 31, 2025

#### **Descriptive Statistics of Air Pollutants\***

Parameter	1-hr PM <sub>2.5</sub> (µg/m³)	24-hr PM <sub>2.5</sub> (μg/m³)	1-hr PM <sub>10</sub> (µg/m³)**	24-hr PM <sub>10</sub> (μg/m³)**	1-hr O <sub>3</sub> (ppb)	1-hr NO <sub>2</sub> (ppb)	1-hr NO (ppb)	1-hr CO (ppb)
Min								
	0.01	0.31	0.00	1.25	0.00	2.70	1.48	0.30
Mean								
	2.34	2.37	29.60	30.46	16.65	13.18	5.07	0.73
1 <sup>st</sup> Max								
	40.95	17.15	3383.00	393.00	50.90	68.41	231.19	4.80
2 <sup>nd</sup> Max								
	38.52	12.98	1600.00	250.38	49.90	51.34	141.39	3.30

#### **Data Discussion**

Yakutat's  $PM_{2.5}$  ambient air quality for the winter 2024-25 season fell mostly in the "good" range of the Air Quality Index (AQI; more information about AQI is provided on page 3), with one brief period in the "moderate" AQI level in January, and several hours in the "moderate" to "unhealthy" AQI range in February. Diurnal patterns show little variability of  $PM_{2.5}$  concentrations across different times of day or days of the week, with January reporting slightly higher average concentrations compared other months in the reporting period.

STATE OF ALASM

Prepared on 04/30/2025 Page 2

<sup>\*</sup> These statistics are based on preliminary data readings and are intended to provide a brief overview of sensor activity. Finalized data may be obtained upon request and through our annual statistical reports. Data from the community sensor network is non-regulatory and not comparable to the EPA's National Ambient Air Quality Standards (NAAQS; more information about the EPA NAAQS is provided on page 3).

<sup>\*\*</sup> PM<sub>10</sub> particle sensors are influenced by weather events such as fog and snow due to hygroscopic effects, creating false maximum values that do not pose health risks.
