

ANTHC Small Treated Water Systems Virtual Training January 21 - 31, 2025

This class is good for people new to water treatment, those that need small treated certifications, back-up operators, those that have no certification and those that have had trouble passing higher level ADEC exams in the past.

The first week, class will be held on January 21, 22 and 24 (TWF) to account for Martin Luther King Day. The second week, classes will be held on January 27, 29 and 31 (MWF). Both weeks class will take place from approximately 10:00 am- to 1:00 pm (agenda attached).

At the conclusion of the course, operators can take their State of Alaska, Small Treated Water Systems Certification Exam in their home communities. Our staff will work with ADEC to find a local proctor and ensure that exams arrive in the community prior to the testing date. We suggest taking the exam as soon as possible after the conclusion of the course.

To take part in the course, operators will need:

- Time allotted in their work schedule to attend the training and prepare for the exam
- Use of a computer and a calculator
- An active email address to receive documents for the course and links to Zoom class room
- Consistent internet access and the ability to watch/listen over Zoom
 - Our staff will provide an orientation to Zoom at the beginning of the course
- A mailing address to send the class workbook to prior to the class

Please fill out the information below and return to bjberube@anthc.org before **December 23, 2024** to secure a spot in the class.
