### Solid Fuel Burning Device Registration

One of the requirements of the Serious Air Quality Plan (SIP) is that wood-fired heating devices shall be registered. This requirement is only for the Fairbanks North Star Borough nonattainment area. 18 AAC 50.077 (h) identifies the specific times when registration is required.

Registration is required of owners, vendors, or dealers when the following circumstances occur:

- Upon the sale or conveyance of a device;
- Before closing, if the device is being sold, leased, or conveyed as part of an existing building or other property;
- When applying for a waiver;
- To participate in the Burn Right Program;
- To participate in a woodstove change-out or conversion program; and
- Before closeout of any compliance or enforcement action.
- Voluntary

If devices are not registered as required, the responsible party(s) may be found out of compliance with 18 AAC 50.077(h).

Registration, other than the above or on a voluntary basis, is not required.

Registration information is useful in planning as well as in implementing and demonstrating compliance with the requirements of the SIP.

Personal information provided in the registration forms may be subject to disclosure under the Alaska Public Records Act, AS 40.25.

An individual who submits personal information in the registration forms may challenge the accuracy or completeness of the information following the process provided in AS 40.25.310.
