Received information over the radio and from Troopers that there was a powerline fire that caught a tree on fire, down Ciechanski Road. CES and one Forestry engine responded, and HEA was notified. When the Forestry engine arrived on scene, they reported that the fire was in tree branches, but there was no additional fire growth/activity. HEA arrived on scene, de-energized the powerlines, and K-62 stayed on scene to ensure there was no further wildland involvement/fire spread. The fire was called contained, controlled and out, and K-62 departed scene.

At 18 acres the fire has had no growth, though a gentle breeze was waking up a few hot spots. The crew was able to lay hose around the fire, doing some cutting around the north side through the west flank and brushing out the hottest area of the fire. The IC anticipates 20% containment by the end of shift. The crew still has quite a bit of cutting to do, which will be the next objective. While the hottest part of the fire on the north end has solid line around it, the south end still needs to be brushed out. This area has cooler temperatures.

Fire activity is still very active with torching, wind driven runs, and spotting. Most of the fire progression has been to the south and southeast.

The villages of Mountain Village, Pitka's Point, and St Marys are now under threat as well as numerous structures in the area on allotments to the south and east of the fire. Evacuations plans are being developed for St. Mary's. 500 people of St. Mary's went into level 1 'ready' evacuation status on June 10th, 145 have been temporarily sheltered in Bethel.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.

Fire activity includes backing, isolated torching, and short runs. Fire progression to the south has moderated with cooler temperatures and west winds bringing in coastal moisture.

Moderated temperatures and a wind shift from the north to the west has greatly decreased fire behavior over a large portion of the fire. Direct attack is becoming an option on the west flank.

Heavier fuels on the east flank may be more difficult to extinguish. A pre-existing fireline is being improved to protect the community of Pilot Station.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.

Fire personnel continued to assess values at risk, map structures and mop up the fire edge around the Nixon Fork Mine. Additional structures were identified and will be assessed. The Yukon Crew continued to construct point-protection in Medra, completing one group of structures and moving to another larger group. Detection aircraft 7MZ flew the fire and reported the fire had reached the Nixon Fork at the confluence of Ruby Creek. The northeast perimeter is spotting. The interior and perimeter are inactive for much of the southeast perimeter.

Continue preparing the indirect fireline protecting St. Marys, Pitka's Landing, Mountain Village, and numerous Allotments. Lack of available vehicles (trucks, UTVs) is hindering current efforts in this area. If burning becomes necessary incoming crews will be needed to support a potential burning operation that could extend over 20 miles.

Moderated temperatures and wind shift from the west/southwest has greatly decreased fire behavior over a large portion of the fire. Direct attack on the western flank continues with support from firebosses. UAS aerial ignition between the north fork and east forks of Andreavsky River are progressing well. A pre-existing fuel break is being improved to protect the community of Pilot Station. 2 additional type one crews arrived at Pilot Station.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.

Fire personnel reported cooler weather with a couple light showers, but no significant precipitation, followed by blue skies. Fire activity was light with some heavier smoke in the interior. Lines are holding well. The Midnight Sun Crew worked on snag removal near the line and smokejumpers burned out some duff near the northeast corner. Fire personnel plan to continue removing fuels near the line tomorrow.

Fire activity is much reduced with multiple days of high RH and some rain last night and today. There are several areas on the perimeter with slow fire progression today.

6/18 planned actions: On the southeastern flank, mop up and patrol line down to the east fork of the Andreafsky River. Allotment and structure assessment continues northeast of Pilot Station. Personnel will prep allotments/cabins directly north of the fire. Assessments of structures and allotments along the Yukon River.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.

Alaska Black IMT2 (IC Sanford). Fires 205 and 239/240 had active surface fire within the black spruce and tundra with torching and short-range spotting. The fire had up to 4 miles of growth to the Southeast by the end of the burn period. Approximately 121 fire line resources are assigned to the complex including {2} Type 1 hand crews (Pioneer Peak and Winema) and various overhead. {1} Type 2IA hand crew (Gannett Glacier) is also assigned to the complex. These resources continue to identify and validate known sites that require defensive action and initiate structure protection measures, as needed. Unawweep conducted a successful burnout operation to address point protection concerns spotted by aerial reconnaissance at Pebble mine. Fires are being assessed daily by aerial surveillance or satellite imagery or ground reconnaissance. Aniak staging is in place to support current and future resources assigned to the complex. Plans for a small staging area out of Illiamna to support fires 239/240 and 205.

Alaska Black IMT2 (IC Sanford). Fires 193, 245/246, 247, and 273 were reconned aially today and showed no smoke. Fire 240 is active on the SW and north ends. Burnout operations with the Unawweep Fire Use Module on fire 205 were successful. Approximately 115 fire line resources are assigned to the complex including {2} Type 1 hand crews (Pioneer Peak and Winema) and various overhead. {1} Type 21A hand crew (Gannett Glacier) is also assigned to the complex. These resources continue to identify and validate known sites that require defensive action and initiate structure protection measures, as needed. Fires are being assessed daily by aerial surveillance or satellite imagery or ground reconnaissance. Aniak staging is in place to support current and future resources assigned to the complex. Plans are continuing for a small staging area out of Illiamna to support fires 239/240 and 205.

Total acres reported for the 18 fires is 494,030

The incident had light winds and the temperature cooling throughout their operational period. Two crews, Union Interagency Hotshot Crew and Redmond Interagency Hotshot Crew, joined the smokejumpers on this incident. The personnel worked on both the right and left flanks. They worked on three spots on the right flank, and received aerial support as well. The left flank was mopped up and is holding fairly well. The crews plan on continuing mopping up the fire during the 6/23 operational period and establishing a strong edge with saws.

At 1449, Mat-su forestry dipatch received a call from the Anchorage Fire Department about a wildland fire that was burning at the corner of Dowling and Elmore. The fire was reported as 2-3 acres in size, 75% active perimeter and burning in thick black spruce. The fire was plotted in Critical suppression management area and it was determined that action needed to be taken. Two tankers, Aerial Supervision, 1 Crew, and 1 out of area helicopter were ordered along with zone helitack personnel and Engines to fight the fire. After better mapping the fire size was determined to be 13.1 acres and by the end of shift, DOF resources had a hose lay around the perimeter of the fire and is 50% contained.

Alaska Black IMT2 (IC Sanford). Burnout operations with the Unawep Fire Use Module on fire 205 were successful again today. Personnel were inserted into the Crooked creek area and began structure protection measures on fire 206. Air attack reports fire active on all sides, of note the NW and W sides of fires 239/240. Values there have protection measures in place, and personnel monitoring the fire.

Approximately 118 fire line resources are assigned to the complex including {2} Type 1 hand crews (Pioneer Peak and Winema) and various overhead. Pioneer Peak will be on R&R days over the weekend and will return Monday, June 28th. {1} Type 2IA hand crew (Gannett Glacier) is also assigned to the complex. These resources continue to identify and validate known sites that require defensive action and initiate structure protection measures, as needed. Fires are being assessed daily by aerial surveillance or satellite imagery or ground reconnaissance. Aniak staging is in place to support current and future resources assigned to the complex. Plans are continuing for a small staging area out of Iliamna to support fires 239/240 and 205.

AST toned out a grass fire with possible tree down on a powerline, spreading quickly in the area of Razdolna Village. KESA engines responded, along with two DOF engines and H-3SH. Upon arrival, was estimated to be a 2'x8' fire in grass and a single tree that was no threat to the community, with no active flame and appeared to be out. DOF Prevention will investigate the fire during the next operational period.

This fire was called in on the Klatsuta River about two miles upriver from the Yukon. Smokejumpers were requested to assist in fire operations and J-90 deployed twelve personnel. The fire was initially reported to be 40 acres, 40% active, and burning with two heads towards the north. Due to structures and allotments in the area, J-90 ordered additional aircraft to assist: Air Attack 2GA, Scoopers 260 and 262, Lead Plane A4, Tanker 52, Fireboss groups 211/214 and 216/217 and Helicopter 920. The fire picked up to 250 acres in mixed continuous black spruce on the east side and mixed hardwood on the west, 85-90% active perimeter with a south wind. The fire is running and crowning at the most vigorous point of the perimeter with primary spread to the north on a south aspect. The fire is currently 480 acres and is experiencing hot and dry conditions with winds out of the south. The personnel on scene will continue to work on protecting values potentially at risk and containment of the fire into the 6/25 operational period.

Alaska Black IMT2 (IC Sanford). Burnout operations with the Unawep Fire Use Module on fire 205 were successful and mop up is complete around Pebble Mine. Personnel that were inserted into the Crooked creek area are continuing structure protection measures on fire 206. Air attack continues to monitor fire behavior for Fire 239/240. Resources are in place along the Mulchatna River on several sites to react and protect those values. Resources in and around the Lime Village area are continuing structure protection measures and will complete hose lay operations to support future defensive firing operations.

Approximately 102 fire line resources are assigned to the complex including {2} Type 1 hand crews (Pioneer Peak and Winema) and various overhead. Pioneer Peak will be on R&R days over the weekend and will return Monday, June 27th. {1} Type 2IA hand crew (Gannett Glacier) is also assigned to the complex. These resources continue to identify and validate known sites that require defensive action and initiate structure protection measures, as needed. Fires are being assessed daily by aerial surveillance or satellite imagery or ground reconnaissance. Aniak staging is in place to support current and future resources assigned to the complex. Plans are continuing for a small staging area out of Illiamna to support fires 239/240 and 205.

Alaska Black IMT2 (IC Sanford). Defensive actions on fire 205 were successful and mop up is complete around Pebble Mine infrastructure. Personnel that were inserted into the Crooked creek area are continuing structure protection measures on fire 206. Air attack continues to monitor fire behavior for Fire 239/240. The fire bosses are used to protect values at risk along the Mulchatna River. Resources in and around the Lime Village area are continuing structure protection measures and will complete hose lay operations to support future defensive firing operations.

Approximately 98 fire line resources are assigned to the complex including {2} Type 1 hand crews (Pioneer Peak and Winema) and various overhead. Pioneer Peak is on R&R days over the weekend and will return Monday, June 27th. {1} Type 2IA hand crew (Gannett Glacier) is also assigned to the complex. These resources continue to identify and validate known sites that require defensive action and initiate structure protection measures, as needed. Fires are being assessed daily by aerial surveillance or satellite imagery or ground reconnaissance. Aniak staging is in place to support current and future resources assigned to the complex. Plans are continuing for a small staging area out of Illiamna to support fires 239/240 and 205.

Alaska Black IMT2 (IC Sanford). Air attack continues to monitor fire behavior for Fire 239/240. The fire bosses were used all day to protect values at risk along the Mulchatna River. Resources in and around the Lime Village area are continuing structure protection measures and completed and tested hose lay operations to support future defensive firing operations.

Approximately 109 fire line resources are assigned to the complex including {2} Type 1 hand crews (Pioneer Peak and Winema) and various overhead. Pioneer Peak will return to shift tomorrow. {1} Type 2IA hand crew (Gannett Glacier) is also assigned to the complex. These resources continue to identify and validate known sites that require defensive action and initiate structure protection measures, as needed. Fires are being assessed daily by aerial surveillance or satellite imagery or ground reconnaissance. Aniak staging is in place to support current and future resources assigned to the complex. Plans are continuing for a small staging area out of Illiamna to support fires 239/240 and 205.

Personnel reported muggy weather with calm winds and smoke. Crews from one area on the fire worked on establishing a saw line and getting the hose lay connected. A second area worked on a recon mission for cabins and started prepping. Four smokejumpers were demobilized during the operational period and five to six additional smokejumpers will be demobilized during the afternoon of 6/27. The containment at the end of shift was 40%.

Smoke settled over the fire, limiting visibility to 1 mile with a 500 foot ceiling. The weather was cool and smokey with a cloud inversion lifted in the afternoon and highs and lows of 70 and 30 degrees. Around the north cabin, the fire has progressed within one mile and is backing towards structure to the south. The group worked on prepping cabins one and two as a scouting group located 5 additional cabins. On Allotment #4, low fire activity was reported and crews worked to clean up pockets of heat. Additionally, the last crew was unable to see what the fire behavior was like due to poor visibility but continued to work on the fire.

Forestry received a report from Matcom at 1910 hours reporting that there was a male burning grass with a weed burner attached to a propane tank at a residential area in Wasilla. Fire personnel arrived and found the burn to be mostly extinguished with a small escapement 0.1 acres in size. Fuels involved were leaf litter. Fire personnel educated the home owner on safe burning practices. Fire was declared to be administratively out.

A Forestry engine on patrol reported a column of smoke in the distance. Two Forestry engines worked to gain access to the fire while air attack gave an initial fire size up. Upon initial size up, fire was 1 acre with rank 3 fire behavior, as well as structures within a mile of the fire, and additional resources were ordered. Ground personnel found the fire to be 0.5 acres with rank 2-3 fire behavior, and conducted initial attack while other resources were inbound. The IC on scene established unified command with Kenny Lake VFD. Along with ground personnel and air attack one tanker, two scoopers, one helicopter and six smokejumpers responded. All resources worked to extinguish flames and secure the edge with water and saw line. All area personnel were released the smokejumpers remain on scene.

Alaska Black IMT2 (IC Sanford). Air attack continues to monitor fire behavior for Fire 239/240. The fire bosses and scoopers were used all day to protect values at risk along the Mulchatna River. Resources in and around the Lime Village area are continuing structure protection measures and completed and tested hose lay operations to support future defensive firing operations. Many of these areas were affected by smoke and slowed some operations.

Approximately 108 fire line resources are assigned to the complex including {2} Type 1 hand crews (Pioneer Peak and Winema) and various overhead. {1} Type 21A hand crew (Gannett Glacier) is also assigned to the complex. These resources continue to identify and validate known sites that require defensive action and initiate structure protection measures, as needed. Fires are being assessed daily by aerial surveillance or satellite imagery or ground reconnaissance.

Fire 239/240:

Fire movement continues to be monitored with use of AA and UAS to track movement. Fire bosses were used to protect values along the Mulchatna river. Resources are in place along the Mulchatna River on several sites to react and protect those values. Resources in place will begin to work and recon from the Chatna river lodge south and from Jason`s corner north. An additional type 2 helicopter with module will be in place in Illiamna to assist. Continued use of fire bosses to aid ground-based suppression modules.

Fire 205: Defensive actions are complete. Fire perimeter growth continues to be monitored by resources. Mop up around structures is complete.

Resources in and around the Lime Village area are continuing structure protection measures and completed and tested hose lay operations to support future defensive firing operations. Many of these areas were affected by smoke and slowed some operations.

Approximately 105 fire line resources are assigned to the complex including {1} Type 1 hand crews (Winema) and various overhead. {1} Type 2IA hand crew (Gannett Glacier) is also assigned to the complex. These resources continue to identify and validate known sites that require defensive action and initiate structure protection measures, as needed. Fires are being assessed daily by aerial surveillance or satellite imagery or ground reconnaissance.

The AKIMT2 green team will be in briefed tomorrow in preparations for a transfer of command.

Winds were consistent over the fire with good RH recovery. The smoke cleared out in the early afternoon allowing for better visibility and sunshine; this evening was clear with light winds. Personnel conducted burn out operations around a cabin at the mouth of Sunset Creek for structure protection. Fire behavior was pretty active with northwest winds, burning downhill. In the afternoon the fire stood up with the most action on the right shoulder and is quieting down for the night. The plan for 6/29 is to return to Sunset Creek and monitor the sprinklers and to check on the location of the burn out operation.

Resources in and around the Lime Village area are continuing structure protection measures and completed and tested hose lay operations to support future defensive firing operations. Many of these areas were affected by smoke and slowed some operations.

Approximately 99 fire line resources are assigned to the complex including {1} Type 1 hand crews (Winema) and various overhead. {1} Type 2IA hand crew (Gannett Glacier) is also assigned to the complex. These resources continue to identify and validate known sites that require defensive action and initiate structure protection measures, as needed. Fires are being assessed daily by aerial surveillance or satellite imagery or ground reconnaissance.

The AKIMT2 green team (IC Butteri) was inbriefed today and will assume command at 0700 tomorrow.

The fire was reported by locals in Napakiak, Napaskiak and Bethel. The fire plotted in Full protection, several structures and allotments were located to the North of the fire. Air attack, tankers and smoke jumpers were requested. Detection aircraft N208W was diverted and reported the fire as 5-7 acres, 90% active backing, creeping and flanking with 1-3 foot flame lengths. Locals responded and set up 3 pumps and worked the Southern portion of the fire. AA-7GB and T-540 responded from Palmer and reported the fire to be 100 acres, Rank 3 and 50% active. T-540 dropped one load of retardant. A fish camp was identified near the right flank. 7PA and helitack responded from McGrath but were unable to reach the fire due to low visibility/smoke, they will respond 7/1 if conditions allow.

We got the structure protection for few buildings, fire is mostly just backing about a half mile away, we've been flying everyday, we have a dedicated mark 3 for the cabin, and natural barriers around the cabin/ there will be type 3 team coming in Sunday how much longer do you think engagement at the cabin depends on the wind we did have cloud cover today, but if we have clearing and S winds its going to uptick.

Fire 244/273, Lime Village Group:

Resources in Lime Village will continue to reinforce indirect control lines and pre-treat fuels around the village. The fire is approximately 5 miles out from the village and precipitation is in the forecast. Burning off of the indirect line around Lime Village will be carefully evaluated considering observed fire behavior and updated fire weather forecasts. North Point protection group will attempt to fly out to fire 244 to assist with operations south of Lime village. There are several cultural sites that are in the area that need to be evaluated and protected on fire 244.

Fire 239/240/205, Iliamna Group:

Continue to utilize UAS and aerial assets to scout and recon fire area. Scout North along the Mulchatna River for additional values as well as to the south and east along the Stuyahok River. Evaluate supplies and fuel inventory at pump sites and place orders as necessary. Resources will remain in place along the Mulchatna River and continue to provide site protection to values as needed. Where necessary secure fires edge and mop-up to protect known values. Resources on fire 240 will continue to scout out in advance of the fires current footprint for values that have not been identified as well as look for opportunities to secure portions of the fire that have impacted allotments or pose a threat to allotments.

Troopers toned out a vehicle fire that was spreading to some nearby trees. They also reported that a motor home was fully involved. 123SH and four DOF engines responded, as well as two engines, 1 medical and Chief 2 from CES. When DOF resources showed up, they provided a size-up in which they relayed the fire had no active flames or perimeter, and it was determined that CES had the situation under control. 123SH and two DOF engines were released. Due to biohazardous materials, the remaining DOF resources performed a grid in the green and then departed for the station.

Nikiski Fire Department (NFD) toned out a campfire/outside fire that was approximately 20' x 20'. Two DOF engines and one DOF Prevention trucks responded to the fire. While DOF engines were en route, NFD further reported that the fire was spotting and spreading into the woodline. 123SH was launched to the fire; meanwhile NFD reported that two firefighters and one tanker were on scene of the fire, with two other tankers en route. Once DOF Prevention arrived, they reported that the fire was approximately .25 acres, rank 2, creeping and running up the main road with 100% active perimeter. A secondary DOF Prevention truck was ordered. Shortly after, 123SH reported that NFD had water on the fire and knocked down the flames. 123SH and one DOF engine were released, and the remaining DOF resources remained on scene for mop up. The fire was eventually called controlled and will be monitored. All DOF resources were released from the incident.

Nikiski Fire Dept. toned out a report of a tree down on a powerline that started a fire. Two DOF engines and one DOF Prevention responded, as well as Nikiski Fire resources. DOF engines arrived on scene to find a 5'x5' smoldering grass fire, with 0 flame length, that also involved a tree. DOF resources began mop up, and a second fire was found roughly 250 feet away. Prevention relocated to that fire, and the remaining resources stayed on scene to mop up, until their work was completed. The fire was called controlled and contained and DOF resources departed scene. The fire will be monitored.

Fire 244/273, Lime Village Group:

Resources in Lime Village commenced burnout operations on the evening of 7/3 along an indirect line adjacent to the village. Half of the indirect line has been burned and crews reported good depth and consumption. All resources worked into the early morning and therefore required a late start to mitigate 2:1 work to rest. Firing was attempted again today but put on hold due to high RH values and smoky overcast skies. Tomorrow's plan will be dependent upon the weather. Resources are in place to complete the burn if feasible. Mop-up and patrolling previously burned areas will take place 7/5.

MATCOM paged out Forestry resources to a fire shortly after midnight to a growing smoke column. Two Forestry engines responded to the call and established unified command with Central Fire Department. Resources on scene worked to contain and begin mop up of a slash pile in the area with escapement into the wildland. The night shift engine transferred command to two day shift engines to complete mop up. Finding no heat or smoke in the green or the burn the fire is contained.

Malheur Rappel crew and Galice WFM will mop up Lime Village burnout. Objective is to mop up this portion of the fire 100%. Garden Valley and Idaho Panhandle modules will insert into an isolated portion of the east flank on fire 244 adjacent to Trout and Tundra Lakes. The modules will work to secure roughly ½ mile of hot edge. The remainder of this flank appears to be cold and is anchored into a rock scree and Trout Lake. Securing this portion of the fire will provide protection to Trout and Kotokbuna Lake allotments

Malheur Rappel crew and Galice WFM will continue to mop up Lime Village burnout. Objective is to mop up this portion of the fire 100%. Garden Valley and Idaho Panhandle modules will work the fires edge on an isolated portion of the east flank on fire 244 adjacent to Trout and Tundra Lakes. The modules will work to secure roughly ½ mile of hot edge. The remainder of this flank appears to be cold and is anchored into a rock scree and Trout Lake. Securing this portion of the fire will provide protection to Trout and Kotokbuna Lake allotments.

Malheur Rappel crew and Galice WFM will continue to mop up Lime Village burnout. Objective is to mop up this portion of the fire 100%. Garden Valley and Idaho Panhandle modules have worked the fire edge achieving 100% mop up and secured the fire edge adjacent #244 Trout and Tundra Lakes. These resources will reposition to the Tundra Lake inholding and start protection of that allotment. Protection of the allotment will mitigate protection concerns. Continued effort will secure this portion of the fire will provide added protection to Trout and Kotokbuna Lake allotments.

Thunderstorms over a majority of the fire area last night and this morning provided a wetting rain.

Rainfall amounts over last 24 hours (16:30-16:30 AKDT) ranged from 0.07" to 0.97" inches. These values were recorded from three RAWS stationed around the fire's perimeter.

The rain has significantly diminished fire activity, with most locations showing minimal activity overall.

Although some areas have shown diminished activity, the fire is holding in exceptionally dry deep duff and heavier fuels.

Malheur Rappel crew and Galice WFM will continue to mop up Lime Village burnout. Objective is to mop up this portion of the fire 100%. Garden Valley and Idaho Panhandle modules have repositioned to Tundra Lake inholding and are constructing a saw line for protection to further mitigate potential threats. Efforts will bolster protection measures on this portion of the fire surrounding Trout and Kotokbuna Lake allotments.

Due to decreased fire activity, moderating weather conditions, high fire activity across the geographic area, and increasing need for suppression resources on higher priority incidents, personnel were demobilized from the fire. The zone will continue to monitor the fire with regular surveillance flights. Point protection can be implemented if conditions on the fire change or values become at risk.

The fire spread an estimated 500 acres to the ESE into the Caribou Drainage behind the Haystack Subdivision. The east flank is burning towards the 2021 Haystack Fire Scar and is now estimated to be 2000 acres. Aerial resources held the fire in check as ground forces moved into place. Personnel include the Big River Alaskan contract handcrew, a strike team of 4 engines, 3 dozers, and a water tender. A/A, Air Tankers, Super Scoopers and 3 Fire Bosses worked the fire and completed missions throughout the day. At approximately 1500, west winds pushed spot fires over a portion of the line to the east. Dozers constructed fireline from the saddle below the prominent ridge to Caribou Creek. Dozers connected existing two track roads and previously constructed fuel breaks to natural barriers. Tactical supplies needed to implement the Haystack Subdivision structure protection plan began to arrive. Information sign boards were placed at the Haystack Subdivision entrance and the Hilltop Gas Station.

EVACUATIONS: Due to the Lost Horse Creek Fire activity, a GO! evacuation status remains in effect for the Upper Haystack Drive, including Sharmon Court and all of the Middle Fork Rd in the Haystack Subdivision.

August 4th, Alaska's Type 2 Green Incident Management, under the leadership of Incident Commander, Peter Butteri, will assume command of the fire.

Fire exhibited extreme fire behavior today with group torching, individual torching and spotting. Critical needs are going to be a type 2 crew needed to cover the current crews days off that are coming up, along with aerial resources when asked for, such as FBs or scoopers, and a boat within the next couple of days to insert sprinklers for structures that are threatened to the north. Concerns are also the pipeline to the west. Resources are working to hold what they have completed already at mile 9 of the Pogo Mine road.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.

This Complex includes: 10,923 acres combined in the following fires.

297---Kobe Road  
 289---Nenana River 2  
 288---Nenana River  
 285---Birch Creek  
 257---Teklanika  
 325---Shores Landing

Hot and dry conditions will persist over the fire complex for the next several days and a chinook wind event is imminent for Saturday, which will make for very windy conditions. These weather conditions have resulted in a Red Warning in effect from August 5th, 1200, to August 6th, 2200, increasing fire behavior. The Teklanika River fire, Birch Creek fire, and the Shores Landing fire were active today with short range spotting and group torching. Resources continue to assess values at risk and implement structure and point protection.

AK IMT Green assumed command today. Full suppression is occurring within areas of the fire where Highly Valued Resources and Assets (HVRAs) are at risk of experiencing detrimental effects from the fire. Handcrews are required to control and contain the fire along the southern perimeter in order to protect the HVRAs. Based upon management objectives, it is anticipated that no losses or damage to HVRAs will occur if resources identified are assigned to the incident.

Helicopter 2AE reported this fire as an acre in black spruce with a moderate rate of spread. J-92 was dispatched to assess values at risk and possibly take action on the fire. Upon arrival, fire behavior had increased markedly, and the smokejumper spotter determined that 12 jumpers on the aircraft would not be able to fully suppress the fire in a reasonable amount of time (based on resource drawdown and high fire and fuel indices elsewhere). No values at risk were observed. Fire area will continue to be monitored as conditions and resource availability allows.

This Complex includes: 18,231 acres combined in the following fires.

297---Kobe Road  
 289---Nenana River 2  
 288---Nenana River  
 285---Birch Creek  
 257---Teklanika  
 325---Shores Landing

Temperatures remain above average but not as warm or dry as previous days. The Chinook wind event continued today, but is expected to taper off Monday afternoon, but there is a threat of afternoon thunderstorms beginning Monday that have the potential to produce outflow winds. The fires to the southwest of the Anderson Complex were very active starting in the late morning. This activity brought significant smoke that shaded the Anderson Complex. The Birch Creek and Shores Landing fires were most active with movement to the north and northwest. The Teklanika River fire had minimal growth backing to the south and southwest. Resources continue to assess values at risk and implement structure and point protection.

This Complex includes: 50,696 acres combined in the following fires.

297---Kobe Road  
 289---Nenana River 2  
 288---Nenana River  
 285---Birch Creek  
 257---Teklanika  
 325---Shores Landing  
 286---Bear Creek  
 287---Rock Creek

Recent rainfall has moderated fire behavior on the northern half of the fire area today, slowing fire spread on the Teklanika River and Shores Landing Fires. There was no rain reported on Branch II of the complex. The threat of afternoon thunderstorms remains for the rest of the week, while dense smoke will continue to keep temperatures cool through Tuesday when possibly warmer temperatures arrive over the fire area. Resources continue to assess values at risk and implement structure and point protection and defensive actions as necessary. The Anderson Complex has acquired the Rock Creek and Bear Creek fires to the southwest.

Fire picked up in activity today. The IC requested aerial resources throughout the day but because of low visibility were not able to get any until Bird Dog 135 was able to get out there and determine if visibility was acceptable to fly tactical aircraft. Around 1730, 5 air tankers were requested to drop retardant on the fire. Unfortunately, visibility decreased and the tankers were only able to get a couple drops on the fire before all were released and sent back to Fairbanks and Palmer. Ground personnel put in 3000' of hose lay with sprinklers on the dozer line made from Bison Fields to the river to the east.

This Complex includes: 50,830 acres combined in the following fires.

297---Kobe Road  
 289---Nenana River 2  
 288---Nenana River  
 285---Birch Creek  
 257---Teklanika  
 325---Shores Landing  
 286---Bear Creek  
 287---Rock Creek

Recent rainfall has moderated fire behavior on the northern half of the fire area today, slowing fire spread on the Teklanika River and Shores Landing Fires. There was no rain reported on Branch II of the complex. The threat of afternoon thunderstorms remains for the rest of the week, while dense smoke will continue to keep temperatures cool through Tuesday when possibly warmer temperatures arrive over the fire area. Resources continue to assess values at risk and implement structure and point protection and defensive actions as necessary. The Anderson Complex has acquired the Rock Creek and Bear Creek fires to the southwest.

Full suppression is occurring within areas of the fire where Highly Valued Resources and 238 Assets (HVRA) are at risk of experiencing detrimental effects from the fire. Dozers and Handcrews remain required to control and contain the fire along the southern perimeter in order to protect the HVRAs. Additional indirect line is being constructed for long term management of the fire and further work is being done to improve structure protection measures.

A long term strategy will be developed that includes Management Action Points for the management of the Lost Horse Creek Fire between now and when a season ending event occurs.

Fire behavior today was moderate with mostly Rank 1 observed in unburned green islands and on the northwest/north/northeast flank. Isolated torching interior in falling trees. No new growth on the northwest end of the fire minimal on the north east end. Crews are focused on establishing saw line and hose lays reaching the top of the saddle and have hooked the northwest corner. A new heli-spot (H-5) was established west of the fire on the ridge. Mop-up is going well on the west flank with 50 feet in halfway up the flank. Sprinkler kits are deployed allowing for efficient use of available personnel.

This Complex includes: 50,830 acres combined in the following fires.

297---Kobe Road  
 289---Nenana River 2  
 288---Nenana River  
 285---Birch Creek  
 257---Teklanika  
 325---Shores Landing  
 286---Bear Creek  
 287---Rock Creek

Due to recent wetting rain over the fires in the complex along with high relative humidity coupled with cloud cover minimized fire behavior to creeping and smoldering. Dense smoke will continue throughout the complex which will continue to keep temperatures cool. The threat of afternoon thunderstorms remains for the rest of the week. Resources continue to secure spots, validate structure protection equipment and efforts, and implement structure and point protection and defensive actions as

Fire behavior today was moderate with mostly Rank 1 and Rank 2 observed in unburned green islands and jackpots on the northwest/north/northeast flank. Isolated torching interior in fallen trees. No new growth on the northwest end of the fire, minimal on the east flank. Gusty and erratic winds were observed throughout the day but had minimal impact on fire behavior. Trees continue to come down across the burn area. Crews have nearly completed saw line around northern edge of fire and will be working from both the top and bottom towards each other on east flank. A new heli-spot (H-5) was approved west of the fire on the ridgeline and blivits were flown in to support mop-up operations at the higher elevations. Mop-up is going well on the west flank with 50 feet in, up to the saddle. Sprinkler kits are deployed allowing for efficient use of available personnel.

A new water source was identified and improved to support eastern flank perimeter control and mop-up operations.

**PNQF99** Owner: **State** Unit: **AKDNS-AK Dept. Natural Resources**  
**899** Name: **Anderson Complex** Cause:

This Complex includes: 50,830 acres combined in the following fires.

297---Kobe Road  
 289---Nenana River 2  
 288---Nenana River  
 285---Birch Creek  
 257---Teklanika  
 325---Shores Landing  
 286---Bear Creek  
 287---Rock Creek

Due to recent wetting rain over the fires in the complex along with lower temperatures and high relative humidity has minimized fire behavior to creeping and smoldering. Dense smoke will continue throughout the complex along with cloudy skies will continue to keep temperatures cool. The threat of afternoon thunderstorms remains for the rest of the week. Although the complex has received significant moisture, resources continue to secure spots, validate structure protection equipment and efforts, and implement structure and point protection and defensive actions as necessary.

The Salcha River rose approximately one foot due to the previous day's significant precipitation and fire personnel were forced to relocate supplies and gear off the sand bars. Union IHC continued working the Salcha River corridor completing structure assessment and prep, fine-tuning water systems and cutting around structures. We had two type 2 crews mopping up direct line south of our values at risk. A smoke jumper contingent of three personnel reconned the Alaska pipeline and put together supply orders to use as a contingency line. A contingent of eight smoke jumpers continued securing direct line behind structures on the west flank of the fire supported by one type 2 crew. Light precipitation occurred over the fire this evening.

**PNQF99** Owner: **State** Unit: **AKDNS-AK Dept. Natural Resources**

**899** Name: **Anderson Complex** Cause:

This Complex includes: 50,830 acres combined in the following fires.

297---Kobe Road  
 289---Nenana River 2  
 288---Nenana River  
 285---Birch Creek  
 257---Teklanika  
 325---Shores Landing  
 286---Bear Creek  
 287---Rock Creek

With moderate temperatures and higher minimum RH's, smoldering and creeping were the dominate fire behavior across the complex. With higher winds expected over the weekend, smoke should clear out of the fire area, but wind will also make fuels more available. Resources continue to secure hot spots and the fire edge around structures and will be prepared to implement defensive actions if necessary. Evacuation status has changed to "Ready" for the Kobe AG and North Forties subdivisions along with the city of Anderson.

Fire behavior today was low with isolated pockets of Rank 1 and Rank 2 observed in unburned green islands and jackpots on the east flank at the toe of the slope. No new growth on the fire perimeter. Trees continue to come down across the burn area in earnest. Crews continue to improve control lines on the north side and east flank. Inadequate water sources and elevation gain have made for a challenging hose show. Terrain and water supply locations necessitate the need for a total of 9 pumps throughout the hose lay for adequate pressure and volume to support mop up operations.

This Complex includes: 58,933 acres combined in the following fires.

297---Kobe Road  
 289---Nenana River 2  
 288---Nenana River  
 285---Birch Creek  
 257---Teklanika  
 325---Shores Landing  
 286---Bear Creek  
 287---Rock Creek

With the recent moisture along with higher minimum RH's and excellent overnight recoveries, smoldering and creeping were the dominate fire behavior across the complex. The warmer temperatures today in the afternoon did bring about some isolated torching. This week will bring cooler temperatures and higher RH's with afternoon showers, which will continue to tamper fire behavior. Threat to values at risk remains reduced. Resources continue to secure hot spots and the fire edge around structures and continue to secure line around allotments. Suppression Repair has begun in some areas and will continue through the week. Evacuation Areas for the Rose Hip Creek and Clear Sky subdivision has been changed to "Set" status.

Efforts are focused on direct containment efforts on the southern and southeast portion of the perimeter. An indirect contingency line has been completed from the southwest corner of the fire west to the Elliott Highway to protect Allotments and residences. Another indirect check line is being implemented west of the fire and north of the Elliott Highway to keep fire out of a steep and narrow section of the Highway corridor. Contingency line construction east of Haystack Mountain is also occurring. Fire spread to the north threatens few values and will be monitored. Site protection is in place for two BLM public use Cabins in the White Mountains and an area closure is in place. The Agencies are providing turn-back specifications, a repair plan and an updated WFDSS decision. Most of the resources necessary to meet protection objectives are already assigned to the incident, however additional orders will need to be placed for repair equipment once the fire is secure.

Fire showed considerable activity today, on the SW corner near Quartz lake. Scoopers and fire bosses and air tankers were used in the afternoon as the fire moved toward Quartz Lake and nearby structures, driven by west winds. An additional IHC was ordered to support suppression operations in that area.

**PNQF99** Owner: **State** Unit: **AKDNS-AK Dept. Natural Resources**  
**899** Name: **Anderson Complex** Cause:

This Complex includes: 58,933 acres combined in the following fires.

297---Kobe Road  
 289---Nenana River 2  
 288---Nenana River  
 285---Birch Creek  
 257---Teklanika  
 325---Shores Landing  
 286---Bear Creek  
 287---Rock Creek

With the continued scattered moisture along with higher minimum RH's and excellent overnight recoveries, smoldering and creeping were the dominate fire behavior across the complex. There was some group torching experienced during the afternoon. This week will bring cooler temperatures and higher RH's with a possibility of afternoon thunderstorms, which will continue to tamper fire behavior. Threat to values at risk remains but is reduced. There is minimal fire activity and growth from fires and minimal threat to values at risk. Suppression will be completed prior to the Teams departure. The fire will transition back to a local Type 3 Organization on August 20, 2023.

Work on the east and south portions of the fire is being finished up and backhaul of hose systems to the line will begin soon. Further containment effort on the southwest corner of the fire is required and will continue for several more days. Some structure protection equipment has been removed and this will continue in additional areas. Repair work of contingency dozer line has also begun. Closure orders in the White Mountain area will be re-evaluated and structure protection on the BLM cabins will be pulled when appropriate.
