INCIDENT NAME: M/V Selendang Ayu
SPILL NUMBER: 04259934301
LEDGER CODE: 14142160

TIME/DATE OF INCIDENT: The M/V Selendang Ayu grounded around 6:00 PM, December 8, 2004 on Unalaska Island between Skan Bay and Spray Cape.

TIME/DATE OF THE NEXT REPORT: 1:00 PM January 22, 2005.

TYPE/AMOUNT OF PRODUCT SPILLED: Fuel on board the vessel at the time of this incident was 424,000 gallons of intermediate fuel oil (IFO 380) and 18,000 gallons of marine diesel oil. The midsection fuel tank ruptured when the vessel broke apart and released an estimated 40,131 gallons of IFO 380. The status of the centerline IFO fuel tanks #1 and #3 (originally estimated to contain 176,473 gallons and 104,448 gallons respectively) remains unknown at this time. The actual amount of spilled fuel is also unknown.

LOCATION: The vessel’s position is at 53° 38’ 04” N, 167° 07’ 30” W on Unalaska Island between Skan Bay and Spray Cape. This site is approximately 25 miles in a direct line or 50 sea miles from Dutch Harbor.

CAUSE OF SPILL: The Coast Guard reported at 7:14 PM, December 8, 2004 that the vessel had broken in half.

POTENTIAL RESPONSIBLE PARTY (PRP): Ayu Navigation Snd, Bhd, Port Klang, Malaysia. The operator is IMC Shipping.

RESPONSE ACTIONS: Dependent on weather, today’s response activities will include over flights, shoreline assessment/cleanup, vessel lightering, water quality sampling and wildlife recovery operations. The shoreline assessment team will survey areas in Anderson Bay. Cleanup teams will be in Skan Bay (SKN 14), Portage Bay (PTN 4) and Humpback Bay (HMP 11). An ATV will be used in Humpback Bay to move oily waste from the cleanup sites to the vessels. The protection group will continue to assess sites with protective booming and reconfigure the boom to increase effectiveness and remove boom that is ineffective or no longer needed. The lightering team will resume pumping from the IFO # 4 port tank. Net tows are scheduled for the transit lanes.

On-water Response: There was no change in the status on 1/20/05. The barge Kashega with two Marco skimmers and the Current Buster system aboard the Western Viking vessel are on scene ready for deployment.

Shoreline Cleanup: On 1/20/05 shoreline cleanup crews worked in Skan Bay (SKN 14) Portage Bay (PTN 4) and Humpback Bay (HMP 11) and collected 1,690 bags of oily waste (28 cubic yards). To date, cleanup crews have collected 22,601 bags (377 cubic yards) of oily solid waste. An overflight observed light sheening at the wreck. The Shoreline Assessment Team surveyed Cannery Bay (CNB 1-20) and Anderson Bay (NGW 1-5).

Salvage and Lightering Operations: On 1/20/05 the lightering team removed 15,730 gallons of IFO/Water from #4 port tank. The total volume lightered from the vessel to date is 59,721 gallons of IFO/water and 2,647 gallons of diesel for a total of 62,368 gallons of IFO/diesel.

Vessel Status: There was no change in the status on 1/20/05. On 1/5/05 the USCG reported that a hole was observed on the starboard bow immediately below the name Selendang Ayu. The stern section remains hard aground and has a 3-degree port side list.

Wildlife: On 1/20/05, no new information was available from the wildlife recovery team. On 1/19/05 the USFWS reported that a total of 901 dead birds have been recovered. To date, 29 live oiled birds have been captured and sent
for rehabilitation, 10 were later released, 17 died and 2 were euthanized. To date, 5 sea otter carcasses including two skeletons (cause of deaths unknown) have been recovered.

Commercial Fishery: On 1/20/05, water quality sampling continued in the Akutan and Unalaska areas. Net tows in the Unalaska and Akutan transit zones, Captains Bay and Broad Bay areas did not show any evidence of oiling. To date, seafood inspections at the Dutch Harbor and Akutan processing plants have found all products free of oil contamination. Inspections are conducted days and nights to check crab and pollock as they arrive at the docks.

Several vessels from the opilio crab fishery in the Bering Sea have have returned to Dutch Harbor to deliver their catch for processing. The remaining fleet is enroute to Dutch Harbor and Akutan. The crab fleet left Dutch Harbor and Akutan on 1/13/05 and the fleet has not reported any incidents of contamination thus far. The Unified Command has implemented an enhanced program to protect seafood quality. Shorelines were surveyed in Unalaska Bay and Captains Bay for tarballs and tar patties, vessels are using crab pots and tow nets to detect submerged oil, aerial surveys are checking for floating oil, and additional staff from the ADEC-Environmental Health seafood program are inspecting seafood at Dutch Harbor and Akutan processors.

Staffing: Seventeen State staff and seven ADEC contractors are currently in Dutch Harbor, including eight ADEC seafood inspectors. Additional State spill response staff from ADEC, ADNR, ADFG and the Attorney General’s office outside of Dutch Harbor are actively engaged in supporting the response.

SOURCE CONTROL: On 1/3/05 lightering operations began on the stern section of the vessel and are ongoing as weather conditions permit. See Salvage and Lightering Operations paragraph.

RESOURCES AFFECTED: Resources at risk in the area include marine mammals, marine birds, shellfish and anadromous streams. The protection of cultural resources continues to be a high priority for the Unified Command.

WEATHER: Today: Cloudy, temperatures low to mid 30s, north/northwest wind 10-15 knots, and seas 4-5 feet. Tomorrow: Cloudy, temperatures low to mid 30s, north wind 10 knots in morning then southeast winds 15-40 knots in afternoon and evening, seas 3-7 feet.

UNIFIED COMMAND AND PERSONNEL

F.O.S.C. : Tom Harrison, Commander, USCG
S.O.S.C. : Gary Folley, ADEC
R.P.I.C. : Jack Gallagher, Gallagher Marine Systems
