

**Agenda for Triad Meeting #4:**

1. Status update for field work activities
2. Review of action items and conclusions from previous Triad meeting. Approval of minutes.
  - Excavation screening methods
  - Prioritization of excavation volume
3. Discussion of new site data and evaluating progress towards Work Plan objectives.
  - **UST1770** - Confirm N+E investigation is complete. No exceedances in stepouts.
  - **S1850** - Based on research into historical data, 2 stepouts are proposed to determine the nature and extent of TCE in soil at S1850, at what appears to be a small surface spill.
  - **SS016 Source Area Delineation** - Confirm current excavation limits are OK.
  - **OAP Gore Sorber Results in eastern airfield** - Review & approve proposed soil borings based on soil vapor results. We propose collecting GP001, GP002, and GP003 as proposed in the OAP FSP, and moving GP004 and GP005 to locations of Gore Sorber hits at VP013 and VP011, respectively. 1 new boring proposed at VP031.
  - **CG001 (MGH) Data Gaps Resolution** - Discuss data gaps associated with borings already installed, and propose samples to eliminate remaining data gaps using 2011 survey elevations of proposed samples.
4. Identifying additional work needed and/or concurrence that Work Plan objectives have been met.
5. Open discussion for other items
6. Schedule update for upcoming activities
