**SITUATION REPORT**

**INCIDENT NAME:** Mystery sheen – The Bowl in Esther Passage

**SITREP #:** 2 and final

**SPILL NUMBER:** 03229919501

**LEDGER CODE:** Requested

**TIME/DATE OF SPILL:** Unknown. Discovered and reported to DEC at 1:30 PM, on July 15, 2003.

**TIME/DATE OF SITUATION REPORT:** 12:00 pm on July 18, 2003

**TIME/DATE OF THE NEXT REPORT:** This is the last report.

**TYPE/AMOUNT OF PRODUCT SPILLED:** Unknown type/amount. Product appears to be diesel fuel, bilge oil.

**LOCATION:** The north end of Esther Passage in the “Bowl”, 60° 55.900N, 148° 02.280W, Esther Island in Northern Prince William Sound.

**CAUSE OF SPILL:** Unknown

**POTENTIAL RESPONSIBLE PARTY (PRP):** Unknown

**RESPONSE ACTION:** Alaska Chadux was able to collect most of the sheen, resulting in 200 feet of contaminated sorbent boom and several bags of sorbents to be disposed of properly. A shoreline survey was conducted which indicated very minimal impact. Several moderate to heavy rain events provided a cold water flush of the upper beach areas that had initially appeared to be impacted. Responders demobilized from the area in the late evening of July 16 and a Coast Guard helicopter over flight in the afternoon of July 17 verified that the response effort was effective. The over flight observed only very light gray remnants of scattered sheen remaining in the “Bowl”.

**SOURCE CONTROL:** The source is unknown, appears to be bilge wastes dumped from an unknown vessel.

**RESOURCES AFFECTED:** Waters in Esther Passage and some beach impacts on sheltered gravel beaches in the “Bowl” area.

**FUTURE PLANS AND RECOMMENDATIONS:** Responders, US Coast Guard, and ADEC are standing down and no further actions in the area are planned.

**WEATHER:** Overcast and raining with fog in Port Wells, overcast with rain in Esther Passage.
