

Pederson Hill Creek Watershed Assessment, (Juneau)
Mendenhall Watershed Partnership, \$19,842

Pederson Hill Creek is listed as a priority water in need of recovery, with fecal coliform bacteria being a primary water quality concern. Coliform bacteria contamination has been well documented since 1985. This project will update the watershed assessment for Pederson Hill Creek in order to prepare a Total Maximum Daily Load (TMDL) and recovery strategy for Pederson Hill Creek. Contact Clayton Burrows 907-586-6853.
